I'm not a robot

380 View(s) It can be tough to remember which character uses which lightsaber in Star Wars. There are many colors to choose from. This article series will cover three famous Sith Lords with red lightsabers. We will discuss their backgrounds, fighting styles, skills, and special talents.Darth VaderDarth Vader, the Sith Lord, is named after the Jedi Knight Anakin Skywalker. He is one of the most famous characters in the Star Wars universe. Some of his noteworthy accomplishments are as follows:Master toAhsoka TanoLed the Empires eradication of the Jedi Order following Order 66Co-founded TheInquisitoriusDefeatedObi-Wan Kenobiduring a battle on the Death StarDefeated Darth Sidious during a battle on the Death Star IIWhen Anakin Skywalker's wife Amidala got pregnant, he transitioned to the Dark Side. Skywalker starts to have terrible visions of Amidala dying during childbirth. Anakin feels he must turn to the dark side of the Force to prevent this from happening. Afterwards, Darth Sidious took him under his wing and christened Anakin as Darth Vader.Darth Vader was badly hurt when he fought Obi-Wan Kenobi on the planet Mustafar. To move again, he needed major cybernetic surgery. At this point, Darth Vader is shown in his most iconic forma black robotic suit topped off with a terrifying mask and helmethaving come of age.After learning that his spouse had died, Vader felt angry. Still, he continued his duty to the Empire. He ruthlessly hunted down the last Jedi survivors when Order 66 was executed.Vader taught the Inquisitorius how to kill Jedi. This was to help him destroy the Jedi Order.Vader was a great duelist. He used Form IV combat moves. He skillfully dodged blaster fire and struck with smooth, easy movements.After undergoing surgery to equip himself with armour and cybernetic implants, Vader's combat style changed from acrobatic to forceful strikes from a steady stance. He also possessed fantastic force capabilities, frequently choking and pushing with force.Darth MaulDarth Maul was a lethal Sith assassin who gained notoriety for his appearance, demeanour, and general fighting prowess. Some of his noteworthy accomplishments are as follows:DefeatedQui-Gon Jinnduring the Battle of TabooMaster to Savage OpressLed the takeover of the planet Mandalore and claimed theDarksaberFounded the criminal army, Shadow CollectiveAnother well-known antagonist is Darth Maul. Few of his Dathomirian Zabrak species are left, and his distinctive dual-bladed lightsaber, black tattoos, and red skin tone make him stand out from the others. Darth Sidious taught Maul to be a fearless, unrelenting, and deadly enforcer of the Sith's will.Maul was cut in half by Obi-Wan Kenobi. Many thought he died at the Battle of Naboo.However, he survived and received a six-legged device to replace his legs. This happened while he was on the junkyard planet Lotho Minor. But in the end, on Tatooine, Obi-Wan Kenobi confronted Darth Maul again and defeated him for good.Darth Maul was a lightsaber duelist with exceptional skill in fighting several opponents at once and performing fantastic acrobatics. During the fight, he used the hostile Form VII and possessed powerful Force abilities. He was capable of mind reading and conjuring up images of himself, in addition to the Nightsisters' magical techniques.Darth SidiousA Sith Lord named Darth Sidious oversaw the Empire during its rule over the galaxy. Multiple times throughout history, his deeds changed the path of events. Some of his noteworthy accomplishments are as follows:The last Supreme Chancellor of the Galactic RepublicFirst Emperor of the Galactic EmpireMaster to Darth Maul,Darth Tyranus, and Darth VaderLast reigning Dark Lord of the Sith underDarth BanesRule of TwoFormed the Confederacy of Independent SystemsFormed the Grand Army of the RepublicHe was a politician for the Galactic Republic under Sheev Palpatine before he assumed the identity of Darth Sidious. Darth Plagueis trained Sidious in the ways of the dark side of the Force.Sidious secretly built the Empire before he announced his rule. He then carried out Order 66, which destroyed the Jedi Order.While he remained under the imperial palace, Sidious tried to use the dark side to shape the Force for his goals. He was a master of deception and strategy. He manipulated and used his slaves to carry out his plans.One of the most formidable force-sensitive people of all time is thought to be Darth Sidious. The first time Palpatine's red lightsaber is seen is during an attempted arrest by four Jedi masters in the chancellor's office. Palpatine swiftly eliminates three of the four Jedi trying to capture him after revealing himself as the Dark Lord of the Sith they have been searching for.Despite not killing Sidious, Mace Windu becomes the first and only Jedi to defeat him in combat. Anakin Skywalker steps in to prevent Windu from killing the emperor. Sidious then electrocutes Windu with such force that he is flung backwards off the Coruscant highrise with his trademark force-lightning.Sidious had a lot of knowledge in Sith magic. He was also good at using Force Persuasion and Force-enhanced speed. Additionally, he could predict the future. With so many lightsaber colors in the Star Wars universe, recounting which character wields which saber can be challenging. In this series, we will discuss three notorious Sith Lords who carried red lightsabers. Expand your knowledge by learning more about red lightsaber history, fighting styles, skill sets, and any rare abilities of Star Wars Sith lightsaber wielders.Darth VaderDarth Vader, the Sith Lord, formerly known as the Jedi Knight Anakin Skywalker, is perhaps the most recognizable character in Star Wars. A list of his notable achievements includes:Master to Ahsoka TanoLed the Empires eradication of the Jedi Order following Order 66Co-founded The InquisitoriusDefeated Obi-Wan Kenobi, his former Master, in battle on the first Death StarDefeated Darth Sidious to save his son, Luke Skywalker, on the second Death StarAnakin Skywalker began shifting to the Dark Side when his wife, Amidala, became pregnant. Skywalker started to have terrible visions of Amidalas death during childbirth, and to prevent that fate, Anakin was driven to the Dark Side of the Force. He then became an apprentice to Darth Sidious, who gave Anakin the title of Darth Vader. When dueling Obi-Wan Kenobi on the planet Mustafar, Darth Vader was devastatingly injured and underwent intensive cybernetic surgery to walk again. This is when Darth Vader was truly born and is presented in his most recognizable appearance: a black robotic suit outfitted with a menacing helmet and face mask. The switch from blue to Anakins red lightsaber was yet another embodiment of his anger.Bitter upon learning of the death of his wife, Vader continued to serve the Empire, ruthlessly murdering the remaining Jedi who survived following the execution of Order 66. Additionally, Vader trained the Inquisitorius to become Jedi Assassins and aid Darth Vader in his conquest to decimate the Jedi Order.Vader was a skilled duelist and utilized Form IV lightsaber combat technique, easily deflecting blaster fire and striking with smooth, fluid motion. Following the surgery in which Vader was outfitted with his cybernetic enhancements and armor, his fighting style became less acrobatic and shifted to powerful strikes from a stable stance. He also had remarkable Force abilities, often turning to Force-amplified pushes and chokes to restrain adversaries. Darth Maul was a deadly Sith assassin who is highly recognizable due to his appearance, mannerisms, and overall fighting abilities. A list of his notable achievements includes:Defeated Qui-Gon Jinn during the Battle of NabooMaster and brother to Savage OpressLed the takeover of the planet Mandalore and claimed the DarksaberFounded the criminal army, Shadow CollectiveDarth Maul is another iconic villain. His crimson-red skin, covered in black tattoos, along with the crown of horns on his head and his signature dual-bladed lightsaber, make him instantly recognizable. Few of his Dathomirian Zabrak species remain in existence.Maul was thought to have perished in the Battle of Naboo after being cut in half by Obi-Wan Kenobi, but he survived and had his legs replaced by a six-legged apparatus while on the junkyard planet of Lotho Minor. Later, Mother Talzin would replace the spider-like apparatus Maul had built with more permanent cybernetic legs. However, Obi-Wan Kenobi eventually faced Darth Maul again on Tatooine and finished him once and for all.Darth Maul was a lightsaber duelist who incorporated acrobatic stunts and the incredible skill to battle multiple opponents simultaneously. He utilized the aggressive lightsaber Form VII during the battle and had significant Force abilities. Mind-probing and creating apparitions of himself were in his repertoire, and additionally, the magic practices of the Nightsisters. Darth Sidious is a Sith Lord who commanded the Empire during its reign over the galaxy. His actions shifted the course of history on multiple occasions. A list of his notable achievements includes:The last Supreme Chancellor of the Galactic RepublicFirst Emperor of the Galactic EmpireMaster to Darth Maul, Darth Tyranus, and Darth VaderLast reigning Dark Lord of the Sith under Darth Banes Rule of TwoFormed the Confederacy of Independent SystemsFormed the Grand Army of the RepublicBefore becoming Darth Sidious, he was known as Sheev Palpatine, the last of the noble Palpatine bloodline. Sidious was trained in the ways of the Dark Side of the Force by Darth Plagueis. While acting as the representative for Naboo in the Galactic Republic Senate,Sidious secretly formed the Empire behind the scenes before unveiling his regime and executing Order 66 to destroy the Jedi Order. A master of manipulation and strategy, Sidious was an expert in deception and outsourcing his servants to carry out his will, while Sidious remained beneath The Imperial Palace, attempting to use the Dark Side to reshape the Force to his own ends.Darth Sidious is regarded as one of the all-time most powerful Force-attuned individuals. Palpatines red lightsaber is first revealed when four Jedi masters attempt to arrest him in the Chancellors office. Palpatine reveals himself as the Dark Lord of the Sith they have been looking for and quickly kills three of the four Jedi trying to take him captive. Mace Windu then becomes the first and only Jedi to ever defeat Sidious in battle, although he does not kill him. Anakin Skywalker intervenes to stop Windu from killing the Emperor. Sidious then uses his signature Force-lightning to electrocute Windu with such power that he is thrown backward off the Coruscant high-rise.Sidious was also adept at precognition, Force Persuade, Force-enhanced speed, and possessed a wealth of Sith magic knowledge. While Darth Vader, Darth Maul, and Darth Sidious are among the most well-known Sith to wield red lightsabers, theyre far from the only ones. Other notable red lightsaber wielders include Count Dooku (Darth Tyranus), Kylo Ren with his unstable crossguard blade, Savage Opress, and the Inquisitors who hunted Jedi during the Empires rise.Even some Jedi with red lightsabers appear in Star Wars storylines, blurring the traditional lines between Light and Dark. In alternate timelines, Adi Gallia and Luke Skywalker have been red lightsaber users, adding more complexity to the red kyber crystals legacy.Craft Your Red Lightsaber TodayInspired by the power and presence of the red lightsaber color? At Ultrasabers, you can design your own battle-ready double-bladed or single-bladed lightsaber that reflects your inner firewhether you walk the path of a Sith, are a rogue Force-wielder, or are a fallen Jedi. Learn how to make your custom lightsaber by choosing your hilt and customizing your features to wield a saber that channels your strength. Lightsabers are an all-important asset in George Lucass fictional Star Wars world. They are a weapon used predominantly by Force users, be they Jedi or the Sith, but some variations have been used by other characters. The fact that they are mostly used by Force users is explained by the fact that they are actually very hard to control for people who dont have a strong connection to the Force. They are not heavy or anything, but total control over a lightsaber requires a lot of skill, which is why regular characters usually avoid them, although there have been instances in the Expanded Universe where non-Force users used a lightsaber in combat. The movies initially presented three different lightsaber colors blue, green, and red but this was expanded as the franchise developed, and now we have several different iterations of Lightsaber colors. We are bringing you a list of lightsaber colors, as well as their meanings and the most famous users. Editors Note: This guide has been updated in May 2025 with the release of Ahsoka. Lightsabers, integral to Star Wars, serve Jedi and Sith, with rare versions for non-Force users. Functioning requires skill and specific components like modulation circuits, an energy gate, a blade emitter shroud, and an activator. Essential components include the emitter matrix and an activator for on/off control. Extra features like handgrip ridges and blade length adjusters exist. Some have non-lethal training settings. Power is drawn from a suitable cell, and single-bladed ones often have belt attachments for easy carrying. Specially designed ones, like Kylo Rens, use unstable kyber crystals with unique features to stabilize them. Assembling a lightsaber requires precision to avoid dangerous outcomes; an inverted emitter matrix can lead to a catastrophic backfire, causing explosions that may harm nearby individuals. Kyber crystals, the lifeblood of lightsabers, serve as the primary power source and determine the sabers nature. Rare and Force-attuned, they grow naturally on various planets. Both Jedi and Sith use them, with the Sith subjecting crystals to a painful adaptation process. Jedi younglings, during training, mine crystals from the Crystal Cave on Ilum. Larger, powerful crystals are tied to Sith superweapons in legends. Various types of kyber crystals exist, such as Adegan, Mephite, Christophsis, and more. Yodas wisdom emphasizes the crystals centrality: The heart of the lightsaber, the crystal is, highlighting its role in shaping the sabers characteristics. The diversity of kyber crystals underscores their significance in lightsaber construction. As of today, there are 11 main lightsaber colors that have been identified in the Star Wars franchise. Some of them have specific subtypes, but the majority have just the base form. The table below is going to present the main colors and their basic subtypes where applicable: ColorSubtype(s)Known UsersBlueLight blueAnakin Skywalker, Obi-Wan KenobiGreenYellow-greenYoda, Qui-Gon JinnRedRed-yellowDarth Sidious, Darth Vader, Kylo RenPurple (Amethyst)/Mace Windu, Cal Kestis, Vernestra RwohBlackObsidianPre VizslaWhite/Ahsoka Tano, Cal KestisYellow/Asajj Ventress, Rey, Cal KestisOrangeDark orangeCal Kestis, Baylan Skoll, Shin HatiMagenta/Cal KestisCyan/Cal KestisIndigo/Cal Kestis Not what we have given you, a brief overview of the colors, we can continue with our article and elaborateon what each of the colors means and what each of them actually represents. Were going to be approaching the colors in the order they are listed in the table above. In modern times, lightsaber colors really dont have the same weight as they had in ancient times, and the interpretations of each color are based on their historical importance rather than on their modern significance. However, Lucas and the other authors tried to keep the symbolism in modern characters. In that aspect, a blue lightsaber, the most common one seen in the galaxy, represents what was historically known as a Jedi Guardian, the protector of the Jedi Order and a person who embodied bravery and righteousness. Jedi Guardians were fighters and vehemently defended the Jedis ways, and the blue color of their sabers represents those qualities in them. The two most famous owners of a blue lightsaber are Obi-Wan Kenobi, who is the perfect example of the qualities described above, and his former Padawan, Anakin Skywalker, who turned to the Dark Side and became Darth Vader. Luke Skywalker and Rey had a blue lightsaber for a while, and even General Grievous, who had been trained by Count Dooku, had a pair of blue lightsabers. Tera Sinube, an elderly member of the Jedi Order during the time of the Clone Wars, wielded a blue lightsaber with a color so light that it was close to white. The light-blue color of his lightsaber may have been for the purpose of allowing fans to see just how old this character was and how his blue lightsabers blade had started to fade due to how old he and his saber were. The green lightsaber has usually been associated with the most powerful Jedi Knights. Unlike the blue lightsaber, which is usually associated with fighters and soldiers, the green lightsaber represents wisdom and skill. It is usually associated with Jedi who have a strong connection to the Force. Owners of a green lightsaber are experienced and wise; they have a deep and fundamental understanding of the Force, and they are usually among the higher-ranking Jedi Knights. They value harmony and rely more on their mental skills than their fighting skills. That is why they are usually held in very high regard and are among the most respected Jedi Knights in the whole franchise. By far, the most famous owner of a green lightsaber was Jedi Grandmaster Yoda, who is considered to be the most powerful Jedi in history. Yoda was the embodiment of all the qualities associated with a green lightsaber, which is why he is the best example for this section. Jedi Master Qui-Gon Jinn also had a green lightsaber, and had it not been for his rebellious and unorthodox nature, he would have certainly been a member of the Council. Luke Skywalker also owned a green lightsaber later in his life. Interestingly enough, General Grievous also had a pair of green lightsabers, but like the blue ones, they bore no significance for him. History has taught us that kyber crystals had such a strong connection to the Force that they were, practically, sentient objects. With that in mind, we also have to remember the fact that kyber crystals resisted the Sith, and there was no natural way for the Sith to control a kyber crystal. The only was for them to do it was to use the Force to subjugate the crystal in a process that was very painful for both the Sith and the crystal. Since the kyber crystal would bleed during the process, the crystal would change color and become red. Thus, a red kyber crystal doesnt really embody evil, but it does represent pain and suffering, both traits characteristic of the Dark Side of the Force. It also embodies all of the hate a Sith used to make the kyber crystal bleed. This is the reason why a red lightsaber is exclusively associated with the Sith since such traits arent really characteristic of the Light Side of the Force. Historically, all Sith Lords are associated with the red lightsaber, with some of them even having more exotic designs, like Darth Maul or Kylo Ren. Darth Sidious is by far the most powerful user of a red lightsaber, with Darth Vader, his apprentice, being very close. Count Dooku, after leaving the Jedi and going to the Dark Side, also used a red lightsaber. The story of the purple lightsaber is very interesting, as its origins can actually be found off-screen. Namely, Lucas never intended on introducing a purple lightsaber to the canon, but Samuel L. Jackson, who played Mace Windu in the Prequel Trilogy, wanted his lightsaber to be purple because purple was his favorite color. Lucas agreed, and that is how this color was actually introduced into the franchise, which means that it initially had absolutely no meaning. Still, the Expanded Universe authors retroactively gave the color meaning, stating that a purple lightsaber represented moral ambiguity, uncertainty, and reconstruction; this was due to the fact that purple is a combination of red and blue. What does this ultimately mean? It means that a character with a purple lightsaber has connections to both the Light and the Dark Side of the Force. Such Force users have usually been quite powerful as they had to endure the temptation of the other side in order to maintain their personal path. The color purple is also associated with power and royalty. We know that the most prominent users of the purple lightsaber color are some of the most powerful Jedi and are also in positions of great influence. Although Mace Windu, by far the most famous owner of a purple lightsaber, wasnt really ambiguous he held the values of the Jedi Order in high regard he did have his moments, and he was far less composed than, for example, Yoda or Qui-Gon. Still, he was exceptionally powerful, and his ability to stay on the path of the Jedi despite his lightsaber color proves that. Another famous owner of a purple lightsaber was Vernestra Rwoh, who was one of the most prominent Jedi during the time of the High Republic. A black lightsaber also called the Darksaber, is actually a unique lightsaber; there is only one example in existence. The Darksaber is shaped like a traditional sword and its somewhat shorter than an actual lightsaber; still, it is without a doubt a subtype of a lightsaber. The Darksaber is associated with Tarre Vizsla, the first Mandalorian Jedi, who created the Darksaber as a one-of-a-kind weapon. The weapon represented the Mandalorians fight against the Jedi and was a very powerful tool in battle; it also represented the emotions of the Mandalorians (something the Jedi avoided) and their murderous rivalry with the Jedi. At one point, the Darksaber was taken by the Jedi and kept under lock until it was stolen by the Mandalorians and returned to the descendants of Tarre Vizsla. The owner of the Darksaber also claims the title of the ruler of the Mandalorians and the only way to legitimately claim ownership over it is to defeat the former owner in combat (i.e., kill them). As far as the famous owners are concerned, the Expanded Universe, as well as the TV shows, have shown us that it has been owned by Tarre Vizsla, Pre Vizsla, and Sabine Wren, among others. The Mandalorian has also established Moff Gideon and Din Djarin as its owners. During the High Republic, a certain Jedi Master also owned a black lightsaber that had the standard appearance of any other lightsaber. In that regard, the Darksaber probably wasnt as unique as we thought. Although not completely unique, white lightsabers are among the rarest in the whole galaxy. The only two notable examples are, in fact, Ahsoka Tanos white lightsabers. They represent neutrality and autonomy; while they are associated with the Light Side of the Force, they represent an individual who has cut ties with the Jedi despite remaining on the Light Side and an individual who has no connection to the Dark Side of the Force. An interesting thing here is that a white kyber crystal, the basis for a white lightsaber, is not natural but is created by reversing the process with which the Sith creates red kyber crystals. Namely, by using the Force, an individual is able to purify a red kyber crystal, removing the Siths influence from it. During that process, the crystal loses its red color and instead becomes white, remaining completely usable. This form of purification also has its symbolic value, as stated above. Ahsoka Tano is not only the most famous but also the only known user of a white lightsaber in the TV shows. She was able to purify the red kyber crystals from the Sixth Brothers weapon, thus creating two neutral, white crystals, which she used in her lightsabers. However, it was established in the High Republic storylines that there was another Jedi who wielded white lightsabers. Orla Jareni wielded a double-bladed lightsaber that had a hinge in the middle of the hilt so that the lightsaber could have two parallel blades. Along with the white lightsaber, a yellow lightsaber is among the rarest in the galaxy. It is not certain what this color actually represents since no one has ever explained it, but we do know that a purified red kyber crystal (which was made by Jaden Korr) turned yellow on one occasion. That is interesting because the purified color was later changed to white, per the above section. Jedi Sentinels, the powerful protectors of the Jedi Temple, are usually associated with a double-bladed yellow lightsaber. Still, their story doesnt really reveal much about the origins and the symbolism behind one of the franchises rarest lightsaber colors. The powerful Asajj Ventress was the owner of a yellow lightsaber at one point, as was Ahsoka Tano. Still, most people will probably identify Rey, the protagonist of the Sequel Trilogy, as the most famous yellow lightsaber owner, as she is the only one among the three to have appeared in the main movies. The Jedi Sentinels, who guard the Jedi Temple, also use yellow kyber crystals for their weapons. Due to it also being extremely rare, we dont know much about the orange lightsaber. We know that it was canon before the great Disney purge and that it has appeared in the Star Wars Jedi: Fallen Order video game, but there isnt actually any precise theory on its origins or its meaning. One theory states that it is a rarely used color because it is owned by those who have sworn not to use their weapons unless absolutely necessary. During the events of the Ahsoka series, we saw that the master-and-apprentice duo of Baylan Skoll and Shin Hati wielded orange lightsabers that had darker colorations that made them closer to red. Dave Filoni, the series creator, admitted that he made the blades look red on purpose despite the fact that they were actually orange. Baylan and Shin were neither Sith nor Jedi but were characters who dwelled in the grey areas as they werent evil but were willing to do evil deeds to achieve goals that they believed were for the betterment of the galaxy. That would mean that theres a good chance that they have dark orange lightsabers that represent how close they are to falling to the dark side even though they dont necessarily use the same dark power that the Sith and Dark Jedi are known to use. As for the other colors that are mentioned in the table but have not been addressed individually, the reason behind that decision is that we have no story to tell. These other colors, as well as some non-canon ones (like gold or bronze), have appeared in the franchise, but the stories never really revealed much about them, so we have no clue what they represent. There will certainly be more colors in the future so well update the article as they appear, but this is everything we know about the current canon colors of lightsabers in the Star Wars franchise. Have something to add? Let us know in the comments below!Fictional energy source in Star WarsThis article is about the metaphysical power in the Star Wars universe. For other uses, see The Force (disambiguation).The Force is a metaphysical, mysterious, and ubiquitous power in the Star Wars fictional universe. Characters refer to the Force as an energy that interconnects all things in the universe, maintaining cosmic balance. Particularly "Force-sensitive" characters, usually through rigorous self-discipline, training, and mindfulness, are able to connect to the Force and thus access and wield certain supernatural powers. Heroes like the Jedi, a peacekeeping group of warrior-monks, largely seek to "become one with the Force", matching their personal wills with the will of the Force. This is evidenced by their ability to channel its powers, which they do towards selfless goals. Meanwhile, the Sith and other villains try to bend the additional abilities gained through the Force toward their own selfish and destructive desires. Throughout the franchise, this distinction is referred as the light side versus the dark side of the Force. Characters' actions are often described as either helping to bring balance to the Force or, its opposite, causing a disturbance in the Force. The Force and the Jedi religion have been compared to aspects of several real-world religions, such as Buddhism and Taoism. The Jedi catchphrase and valediction "May the Force be with you" has become part of pop culture vernacular.George Lucas created the concept of "the Force" both to advance the plot of Star Wars (1977) and to try to awaken a sense of spirituality in young audience members.George Lucas created the concept of the Force to address character and plot developments in Star Wars (1977).[1] He also wanted to "awaken a certain kind of spirituality" in young audiences, suggesting a belief in God without endorsing any specific religion.[2] He developed the Force as a nondenominational religious concept, "distill[ed from] the essence of all religions", premised on the existence of God and distinct ideas of good and evil.[1] Lucas said there is a conscious choice between good and bad, and "the world works better if you're on the good side".[3] In 1970s San Francisco, where Lucas lived when he wrote the drafts that became Star Wars, New Age ideas that incorporated the concept of qi and other notions of a mystical life-force were "in the air" and widely embraced.[4]Lucas used the term the Force to "echo" its use by Canadian cinematographer Roman Kroitor in Arthur Lipsett's 21-87 (1963), a National Film Board production, in which Kroitor says, "Many people feel that in the contemplation of nature and in communication with other living things, they become aware of some kind of force, or something, behind this apparent mask which we see in front of us, and they call it God".[2] Although Lucas had Kroitor's line in mind specifically, Lucas said the underlying sentiment is universal and that "similar phrases have been used extensively by many different people for the last 13,000 years".[5]The first draft of Star Wars makes two references to "the Force of Others" and does not explain the concept: King Kayos utters the blessing "May the Force of Others be with you all", and he later says "I feel the Force also".[6] The power of the Force of Others is kept secret by the Jedi Bendu of the Ashla, an "aristocratic cult" in the second draft.[7][8] The second draft offers a lengthy explanation of the Force of Others and introduces its Ashla light side and Bogan dark side.[8] The Ashla and Bogan are mentioned 10 and 31 times, respectively, and the Force of Others plays a more prominent role in the story.[9] In this draft, Luke Starkiller's mission is to retrieve the Kyber Crystal, which can intensify either the Ashla or Bogan powers.[7] The film's shorter third draft has no references to the Ashla, but it mentions the Bogan eight times and Luke is still driven to recover the Kyber Crystal.[10][11]Lucas finished the fourth and near-final draft on January 1, 1976.[12] This version trims "the Force of Others" to "the Force", makes a single reference to the Force's seductive "dark side", distills an explanation of the Force to 28 words, and eliminates the Kyber Crystal.[13] Producer Gary Kurtz, who studied comparative religion in college, had long discussions with Lucas about religion and philosophy throughout the writing process.[14] Kurtz told Lucas he was unhappy with drafts in which the Force was connected with the Kyber Crystal, and he was also dissatisfied with the early Ashla and Bogan concepts.[14]"The act of living generates a force field, an energy. That energy surrounds us; when we die, that energy joins with all the other energy. There is a giant mass of energy in the universe that has a good side and a bad side. We are part of the Force because we generate the power that makes the Force live. When we die, we become part of that Force, so we never really die; we continue as part of the Force."George Lucas during a production meeting for The Empire Strikes Back[15]Lucas and screenwriter Leigh Brackett decided that the Force and the Emperor would be the main concerns in The Empire Strikes Back (1980).[16] The focus on the Emperor was later shifted to Return of the Jedi (1983),[16] and the dark side of the Force was treated as The Empire Strikes Back's main villain.[17]See also: Jedi Prequel trilogy"Midichlorians" redirects here. For the bacteria, see Midichloria.The Phantom Menace (1999) introduces midi-chlorians (or midichlorians), microscopic creatures that connect characters to the Force. Lucas later requested a passage about midi-chlorians be retroactively added to notes written in August 1977 expanding on the nature of the Force.[18][19] Lucas based the concept on symbiogenesis,[20] calling midi-chlorians a "loose depiction" of mitochondria.[21] He further said:[Mitochondria] probably had something ... to do with the beginnings of life and how one cell decided to become two cells with a little help from this other little creature who came in, without whom life couldn't exist. And it's really a way of saying we have hundreds of little creatures who live on us, and without them, we all would die. There wouldn't be any life. They are necessary for us; we are necessary for them. Using them in the metaphor, saying society is the same way, says we all must get along with each other.[21]In a rough draft of Revenge of the Sith (2005), Palpatine says he "used the power of the Force to will the midichlorians to start the cell divisions that created Anakin Skywalker".[22] This line was removed as the script progressed.Lucas' story treatments for a potential sequel trilogy involved "a microbiotic world" and creatures known as the Whills, beings that "control the universe" and "feed off the Force." He elaborated that individuals function as "vehicles for the Whills to travel around in", and that midi-chlorians "communicate with the Whills [who] in a general sense ... are the Force."[23] After selling Lucasfilm to Disney in 2012, Lucas said his biggest concern about the franchise's future was the Force being "muddled into a bunch of gobbledegook".[24]When writing The Force Awakens (2015) with Lawrence Kasdan, J. J. Abrams respected that Lucas had established midi-chlorians' effect on some characters' ability to use the Force.[25] However, as a child, he interpreted Obi-Wan Kenobi's explanation of the Force in Star Wars to mean that any character could use its power, and that the Force was more grounded in spirituality than science.[25] Abrams retained the idea of the Force having a light and a dark side, and some characters' seduction by the dark side helps create conflict for the story.[26] Pablo Hidalgo of the Lucasfilm Story Group gave his "blessing" for writer-director Rian Johnson to introduce a new Force power in The Last Jedi (2017) "if the story required it and if it felt like it stretches into new territory but doesn't break the idea of what the Force can do."[27] Johnson observed that every Star Wars movie introduces new Force powers to meet that film's story needs.[27]Star Wars Rebels producer Dave Filoni cites several influences on how the Force is used in the show. The character Bendunamed in homage to the term Lucas originally associated with the Jedidoes not align with the franchise's normal dark-or-light duality, and this role is an extension of Filoni's conversations with Lucas about the nature of the Force.[28] Filoni credits the prequel films for better developing the concept of the Force, particularly the idea of a balance between the light and dark sides.[29]"Jedi mind trick" redirects here. For the band, see Jedi Mind Tricks.This concept art by Greg Knight of a stormtrooper being "Force pushed" was an early visualization of how the Force would be depicted in LucasArts' The Force Unleashed (2008).[30]Obi-Wan Kenobi describes the Force as "an energy field created by all living things" in Star Wars. In The Phantom Menace, Qui-Gon says microscopic lifeforms called midi-chlorians, which exist inside all living cells, allow some characters to be Force-sensitive; characters must have a high enough midi-chlorian count to feel and use the Force. Midi-chlorians are sentient,[1] and arguably were the first species to emerge in the Star Wars universe.[31] The species was a foundation of all life, as some deemed life impossible without midi-chlorians,[32] and ultimately resided in all living beings, connecting two aspects of the Force.[31] The Living Force (also known as a spirit or life essence)[33] is the energy generated by all living things.[34] Through midi-chlorians, it is fed into the Cosmic Force, which binds all things and communicates with living sentient beings.[35]In 1981, Lucas compared using the Force to yoga, saying any character can use its power.[36] Dave Filoni said in 2015 that all Star Wars characters are "Force intuitive": some characters, like Luke Skywalker, are aware of their connection to the Force, while characters such as Han Solo draw upon the Force unconsciously.[37] Filoni said the most potent Force users are characters whose midi-chlorian count provides a natural affinity for using the Force and who undertake intense training and discipline.[38] Rogue One (2016) portrays the Force more as a religion "than simply a way to manipulate objects and people".[39] In the years following the Great Jedi Purge depicted in the prequel trilogy, some characters have lost faith in the Force,[40] and the Galactic Empire hunts down surviving Jedi and other Force-sensitive characters. By the time of the events in The Force Awakens, some characters think the Jedi and the Force are myths.[41]Some Force-sensitive characters derive special, psychic abilities from it, such as telekinesis, mind control, and extrasensory perception. The Force is sometimes referred to in terms of "dark" and "light" sides, with villains like the Sith drawing on the dark side to act aggressively while the Jedi use the light side for defense and peace.[42] According to Filoni, Lucas believed a character's intentions when using the Forcetheir "will to be selfless or selfish"is what distinguishes light and dark sides.[29] The Force is also used by characters who are neither Jedi nor Sith, such as Leia Organa and Kylo Ren.[43][44] Characters throughout the franchise use their Force powers in myriad ways, including Obi-Wan using a "mind trick" to undermine a stormtrooper's will,[45][46] Darth Vader choking subordinates without touching them,[47] Qui-Gon Jinn repelling several battle droids at once, Rey lifting a large pile of rocks, and Kylo Ren stopping blaster fire in mid-air.[48][49] Film and television use of the Force is sometimes accompanied by a sound effect, such as a deep rumble associated with aggressive use or a more high-pitched sound associated with benevolent use.[50]From left: Anakin Skywalker (Sebastian Shaw), Yoda (Frank Oz), and Obi-Wan Kenobi (Alec Guinness) appear as spirits at the end of the original version of Return of the Jedi.Jedi with special training can continue to exist after death, and some interact with the living as "being[s] of light"[51] referred to as "Force ghosts."[52][53] Obi-Wan's spirit provides Luke with guidance at key moments in the original trilogy,[53][54] and Yoda appears as a spirit to guide Luke in The Last Jedi.[55] Voices of past Jedi help Rey at the climax of The Rise of Skywalker, and Luke's and Leia's spirits watch over her at the film's conclusion.[56] In an early draft of Return of the Jedi, Lucas planned to resurrect Obi-Wan and Yoda at the climax,[57] and some drafts included scenes of the two helping Luke stop the Emperor.[58] The final arc of sixth season of The Clone Wars reveals that Qui-Gon Jinn learned how to transition into the "cosmic Force" from entities who represent various emotions;[53] Yoda hears the deceased Qui-Gon's voice in Attack of the Clones (2002), and he reveals in Revenge of the Sith that he has contact with Qui-Gon.[53] A short story by Claudia Gray depicts Obi-Wan learning this technique from Qui-Gon in the years leading up to Star Wars.[59]The Force plays an important role in several Star Wars plot lines. Anakin Skywalker's rise as a Jedi, descent into the Sith Lord Darth Vader, and redemption back to the light side of the Force is the main story arc for the first six Star Wars films.[60] Yoda's arc in the sixth season of The Clone Wars depicts him exploring "bigger questions" about the Force and taking various inspirations from the franchise's expanded universe.[61] In The Force Awakens, Finn's exposure to the Force helps make him question his training.[62] Writer Rian Johnson used the Force to allow Rey and Kylo Ren to communicate in The Last Jedi, developing the characters' relationship.[27]Chris Taylor called the Force "largely a mystery" in Star Wars.[3] Taylor ascribes the "more poetic, more spiritual ... and more demonstrative" descriptions of the Force in The Empire Strikes Back to Lawrence Kasdan, who co-wrote the film, but says the film does little to expand audiences' understanding of it.[3] In 1997, Lucas said that the more detail he articulated about the Force and how it works, the more it took away from its core meaning.[63] Kotaku suggests Rian Johnson depicted more nuance in the Force in The Last Jedi than Lucas did in his films.[64] According to Rob Weinert-Kendt, the "Force theme" in John Williams' score represents the power and responsibility of wielding the Force.[65]Paranormal abilities like the Force are a common device in science fiction,[66] and the Force has been compared to the role magic plays in the fantasy genre.[67] The Star Wars films illustrate that characters not familiar with the particulars of the Force associate it with mysticism and magic, such as when an Imperial officer alludes to the "sorcerer's ways" of Darth Vader.[67] The depiction of the Force in Star Wars has been compared to that of magic in Harry Potter, with the former being described as more of a "spiritual force".[68] According to The A.V. Club, The Last Jedi depicts the Force "closer to the sorcery of fairy tales and medieval romance than it's ever been."[69]Eric Charles points out that the television films The Ewok Adventure (1984) and Ewoks: The Battle for Endor (1985), intended for children, are "fairy tales in a science fiction setting" which feature magic and other fairy tale motifs rather than the Force and science-fiction tropes.[70] These Ewok films have been described as depicting "sorcery" that is distinct from the Force powers depicted in the first six Star Wars films.[71] Drawing from the Star Wars roleplaying game sourcebook he co-authored in 1987, Bill Slavicsek says that "The Ewoks' mystical beliefs contain many references to the Force, though it is never named as such."[72]In his 1977 review of Star Wars, Vincent Canby of The New York Times called the Force "a mixture of what appears to be ESP and early Christian faith."[73] It has been studied in a religious context from an academic perspective.[74] The Magic of Myth compares the sharp distinction between the good "light side" and evil "dark side" of the Force to Zoroastrianism, which posits that "good and evil, like light and darkness, are contrary realities".[42] The connectedness between the light and dark sides has been compared to the relationship between yin and yang in Taoism,[75] although the balance between yin and yang lacks the element of evil associated with the dark side.[76] Taylor identifies other similarities between the Force and a Navajo prayer, prana, and qi.[19] It is a common plot device in jidaigeki films like The Hidden Fortress (1958), which inspired Star Wars, for samurai who master qi to achieve astonishing feats of swordsmanship.[77] Taylor added that the lack of detail about the Force makes it "a religion for the secular age".[3] According to Jennifer Porter, professor of religious studies at the Memorial University of Newfoundland, "the Force is a metaphor for godhood that resonates and inspires within [people] a deeper commitment to the godhood identified within their traditional faith".[78] According to Christian Pastor Clayton Keenan, "the spirituality of 'Star Wars' has to do with the Force. It's depicted as ... something supernatural within this universe, but it's not the same thing as a personal god that Christians or Jews or Muslims might believe in. It's this impersonal force that is in some ways this neutral, impersonal energy that is out there to be used for good or for evil."[79]At one point, Francis Ford Coppola suggested to George Lucas that they use their combined fortunes to start a religion based on the Force.[80] Practitioners of Jediism pray to and express gratitude to the Force.[81]Scientists are mostly skeptical about a "real world" explanation for the Force.[82] Astrophysicist Jeanne Cavelos says in The Science of Star Wars that explaining the Force is particularly difficult because "it does so many different things".[83] Force powers like precognition imply the time travel of information.[84] Cavelos explores the possibility of brain implants or sensors being used to detect users' intent and manipulate energy fields, and compares such discipline to contemporary patients learning to control prosthetics.[85]A scientific explanation of the Force would require new discoveries in physics, such as unknown fields or particles[86] or a fifth force beyond the four fundamental interactions.[87] Flavio Fenton of the Georgia Institute of Technology School of Physics suggests a fifth force would carry two types of chargeone for the light side and one for the darkand that each would be carried by its own particle.[88] Nepomuk Otte, also from Georgia Tech, cautions that Newton's third law of motion says telekinesis would apply a force back on the Force-wielding character.[88] Fabien Paillusson from the University of Lincoln argues that the Force of the Star Wars universe reflects our own quest for understanding the forces of the world we live in.[89]A Feynman diagram of one way the Higgs boson might be produced. National Geographic compared the boson's role in "carrying" the Higgs field to the way Jedi are "carriers" of the Force.[90]See also: Cultural impact of Star WarsNational Geographic compared the Higgs boson's role as "carrier" of the Higgs field to the way Jedi are "carriers" of the Force.[90] A previsualization video highlighting the idea of "kicking someone's ass with the Force" steered LucasArts game designers toward producing The Force Unleashed (2008),[91][92] which sold six million copies as of July 2009.[93] In 2009, Uncle Milton Industries released a toy, called the Force Trainer, which uses EEG to read users' beta waves to lift a training droid-themed ball with a shaft of air.[94][95]The New Republic, Townhall, The Atlantic, and others have compared various political machinations to the "Jedi mind trick", a Force power used to undermine opponents' perceptions and willpower.[96][46][97][98]Critic Tim Robley compared the Force to the ruby slippers from The Wizard of Oz (1939), with both being entities that send the protagonist on a quest.[99] In her 1980 Washington Post review of The Empire Strikes Back, Judith Martin described the Force as "a mishmash of current cultic fashions without any base in ideas. It doesn't seem to be connected with ethics or a code of decent behavior, either."[100] John Simon wrote in his 1977 review of Star Wars for New York magazine:And then there is that distressing thing called the Force, which is ... Lucas's tribute to something beyond science: imagination, the soul, God in man ... It appears in various contradictory and finally nonsensical guises, a facile and perfunctory bow to metaphysics. I wish that Lucas had had the courage of his materialistic convictions, instead dragging in a sop to a spiritual force the main thrust of the movie so cheerfully ignores.[101][102]The introduction of midichlorians in The Phantom Menace was controversial, with Evan Narcisse of Time writing that the concept ruined Star Wars for him and a generation of fans because "the mechanisms of the Force became less spiritual and more scientific".[21] Film historian Daniel Dinello called midi-chlorians "anathema to Star Wars fanatics who thought they reduced the Force to a kind of viral infection."[103] Referring to "midi-chlorians" became a screenwriting shorthand for over-explaining a concept.[104] Although Chris Taylor suggested fans want less detail, not more, in explaining the Force,[3][105] Chris Bell argues that the introduction of midi-chlorians provided depth to the franchise and fomented engagement among fans and franchise writers.[104] Religion expert John D. Caputo writes, "In the 'Gospel according to Lucas' a world is conjured up in which the intractable oppositions that have tormented religious thinkers for centuries are reconciled...The gifts that the Jedi masters enjoy have a perfectly plausible scientific basis, even if its ways are mysterious".[106]Characters' faith in the Force reinforces Rogue One's message of hope.[40] The A.V. Club said Rian Johnson's depiction of the Force in The Last Jedi goes "beyond George Lucas' original transcendental concept".[69] Polygon said Johnson's film "democratize[s] the Force", depicting Force sensitivity in characters from outside a "Force-sensitive lineage" and suggesting that the Force can be used by anyone.[107]"May the Force be with you" redirects here. For other uses, see May the Force be with you (disambiguation).Several Star Wars characters say "May the Force be with you" (or derivatives of it) and the expression has become a popular catchphrase.[108] In 2005, "May the Force be with you" was chosen as number 8 on the American Film Institute's 100 Years... 100 Movie Quotes list.[109] May 4 is Star Wars Day, taken from the pun "May the Fourth be with you".[110] The expression was intentionally similar to the Christian dominus vobiscum, "the Lord be with you".[111]President Ronald Reagan in 1985 said "the Force is with us", referring to the United States, to create the Strategic Defense Initiative (itself often nicknamed Star Wars) to protect against Soviet ballistic missiles.[112] Some weeks earlier, Reagan had compared the Soviet Union to the Galactic Empire.[113] The Gospel According to Star Wars says that Reagan's invocation of the Force was actually perverting Star Wars' "self-dispossessing" (or other-focused) ethos:[The] blessing "May the Force be with you" is the expression of a hope for others ("May the Force be with you"), not for ourselves as with Reagan ("The Force is with us"). Moreover, the [Star Wars] blessing is precisely a request for hope for others ("May the Force be with you"), whereas Reagan's claim sounds like a possessive assertion ("The Force is with us").[114]Speculative fiction portalFilm portalAnima mundiAnimismBrahmanForce field (physics)JediismManitouMysticismMythopoeiaOntologyOrendaPranaPsychicQiPneumaSith^ a b c Windham, Ryder (1999). Though Jedi commonly wield blue or green lightsabers and Sith commonly wield red lightsabers, eight other lightsaber colors exist in Star Wars Canon. Each lightsabers blade color is determined by the kyber crystal, the heart of every lightsaber. Jedi bond with their lightsabers kyber crystal while Sith bend the crystal to their will. Lets take a closer look at all eleven lightsaber colors in Star Wars Canon.AFFILIATE DISCLOSURE This article may contain affiliate links. The ancient Darksaber, a legendary symbol of power for the Mandalorians, emits a black blade with a flat, sword-like appearance. No other black-bladed lightsabers are known to exist in Star Wars Canon. In Star Wars Legends, Darth Vaders secret apprentice Galen Marek / Starkiller may optionally wield a black lightsaber in the video games Star Wars: The Force Unleashed and Star Wars: The Force Unleashed II.The legendary Mandalorian Darksaber, a rare black-bladed lightsaber | IMAGE CREDIT Lucasfilm/DisneyFamous Blue Lightsabers: Obi-Wan Kenobi, Anakin Skywalker, Luke Skywalker, many JediBlue Symbolism: calm, stability, trust, loyalty, sky, seaBlue Lightsaber Blade Color Meaning and HistoryBlue-bladed lightsabers are extremely common among Jedi. Although blue lightsabers are common, the hue of the blue lightsaber may range from light blue to medium or dark blue. In Star Wars Legends the Jedi Guardians, Jedi who focus their studies on martial training and combat, commonly wield blue lightsabers.Obi-Wan Kenobi and Rey both wield blue lightsabers (Rey later builds a yellow lightsaber) | IMAGE CREDIT Lucasfilm/DisneyFamous Cyan Lightsabers: Cal Kestis (optional blade color in video game Star Wars Jedi: Fallen Order)Cyan Symbolism: calm, peace, lagoon, tropical waters (Note: Since cyan is a greenish-blue color, see Blue Lightsaber and Green Lightsaber for other possible symbolism)Cyan Lightsaber Blade Color Meaning and HistoryA cyan lightsaber emits a greenish-blue blade. The color may also be referred to as teal, turquoise, or aquamarine. A cyan-bladed lightsaber is a playable option the video game Star Wars Jedi: Fallen Order (2019). In the game, the playable character Cal Kestis may optionally wield a cyan lightsaber. No other characters in Star Wars Canon are known to wield cyan lightsabers.Cal Kestis may wield a cyan lightsaber in the video game Star Wars Jedi: Fallen Order (2019) | IMAGE CREDIT Lucasfilm/EAFamous Green Lightsabers: Luke Skywalker, Yoda, Qui-Gon Jinn many JediGreen Symbolism: growth, renewal, nature, safety, freshnessGreen Lightsaber Blade Color Meaning and HistoryGreen-bladed lightsabers are extremely common among Jedi. Yoda, Qui-Gon Jinn, and Luke Skywalker all wield green lightsabers. In Star Wars Legends, Jedi Consulars wield green lightsabers. Jedi Consulars specialize in diplomacy and only draw their lightsabers a last resort.As a Jedi Padawan, Ahoka Tano wields a lime green lightsaber shoto as an off-hand lightsaber. Lime green lightsabers are not nearly as common as other shades of green.Jedi Master Qui-Gon Jinn wields a green lightsaber | IMAGE CREDIT Lucasfilm/DisneyFamous Indigo Lightsabers: Cal Kestis (optional blade color in video game Star Wars Jedi: Fallen Order)Indigo Symbolism: calm, wisdom, spirituality, intuitionIndigo Lightsaber Blade Color Meaning and HistoryAn indigo lightsaber emits a deep blade color in between blue and violet (purple). Indigo is sometimes challenging to distinguish from some shades of blue or purple. Nevertheless, the video game Star Wars Jedi: Fallen Order offers an indigo lightsaber color option in addition to default blue lightsaber and optional purple lightsaber. In the game Cal Kestis may optionally wield an indigo lightsaber. No other characters in Star Wars Canon are known to wield indigo lightsabers.Cal Kestis may wield an indigo lightsaber in the video game Star Wars Jedi: Fallen Order (2019) | IMAGE CREDIT Lucasfilm/EAFamous Magenta Lightsabers: Cal Kestis (optional blade color in video game Star Wars Jedi: Fallen Order)Magenta Symbolism: charm, harmony, femininity, compassion, unconventionalityPink Lightsaber Blade Color Meaning and HistoryA magenta lightsaber emits a purplish-pink blade. A magenta-bladed lightsaber is a playable option the video game Star Wars Jedi: Fallen Order (2019). In the game, Cal Kestis may optionally wield a magenta lightsaber.No other characters in Star Wars Canon are known to wield magenta lightsabers. In Star Wars Legends, Mara Jade and the Old Republic era Scions of Zakuul wield magenta lightsabers.Cal Kestis may optionally wield a magenta lightsaber in Star Wars Jedi: Fallen Order | IMAGE CREDIT Lucasfilm/Disney/EAFamous Orange Lightsabers: Cal Kestis (optional blade color in video game Star Wars Jedi: Fallen Order)Orange Symbolism: energy, fire, warmth, citrus, and sunshineOrange Lightsaber Blade Color Meaning and HistoryAn orange-bladed lightsaber is a playable option in the video game Star Wars Jedi: Fallen Order (2019). The orange blade color was originally only available to those who pre-ordered the game. In the game, Cal Kestis may optionally wield a orange lightsaber. No other characters in Star Wars Canon are known to wield orange lightsabers. In Star Wars Legends, Jedi Master Yaddle, members of the Mandalorian Knights, and the Sith Lord Tulak Hord all wield orange lightsabers.The first live-action orange lightsaber debuted in the trailer for Ahsoka, a 2024 Disney+ series. Baylan Skoll and his apprentice Shin Hati each wield an orange lightsaber (the latter wields a double-bladed reddish orange lightsaber, in fact!).Cal Kestis may optionally wield an orange lightsaber in Star Wars Jedi: Fallen Order | IMAGE CREDIT Lucasfilm/Disney/EAFamous Orange Lightsabers: Mace Windu, Ty Yorrick, Vernestra RwohPurple Symbolism: royalty, power, ambition, wisdom, nobilityPurple Lightsaber Blade Meaning and HistoryA purple lightsaber emits a blade color that combines blue and red. The hue of a purple lightsaber may range from almost dark pink a violet/deep purple color. Purple lightsabers are uncommon, but not unheard of in Star Wars Canon.Several purple lightsaber wielders are unconventional or even nonconformist. The wise and powerful Jedi Council member Mace Windu is arguably the most famous purple lightsaber wielder. Two unorthodox High Republic era characters wield purple lightsabers as well: young Jedi prodigy Vernestra Rwoh and the saber-for-hire Ty Yorrick. Revan, an Old Republic era Jedi turned Sith turned Jedi, wields a violet-bladed lightsaber as well. In Star Wars Legends, Anakin Solo and Jaina Solo both wield violet lightsabers along with Ki-Adi-Mundi and a few other characters.Mace Windu, a wise and powerful Jedi Council member, wields a purple lightsaber | IMAGE CREDIT Lucasfilm/DisneyFamous Red Lightsabers: Darth Vader, Darth Maul, Kylo Ren, Darth Sidious, most Sith LordsRed Symbolism: anger, passion, danger, blood, power, fire, love, leadershipRed Lightsaber Blade Color Meaning and HistoryRed-bladed lightsabers are extremely common among the ranks of the Sith, the Jedi hunting Inquisitors, and other dark side Force users. Why do so many dark side Force users wield red lightsabers? The answer lies in the kyber crystal (i.e. lightsaber crystal): the heart of all lightsabers.Typically a Jedi or light side Force user forms an close bond in the Force with the kyber crystal inside their lightsaber. Dark side Force users, however, forgo bonding and instead channel their anger and hatred to bend the kyber crystal to their will. The corrupting of the crystal is known as bleeding the crystal. After the process is complete, the crystal turns red and the dark side Force users lightsaber begins emitting a red blade.In Star Wars Canon, only dark side Force users construct and wield red lightsabers. In Star Wars Legends, red lightsabers are no reserved for for dark side Force users. Jedi Council member Adi Gallia wields a crimson lightsaber. Fellow Jedi Council members Even Piell and Depa Billaba are both depicted wielding red lightsabers in some Star Wars comic books as well. Notably, all three Jedi are later depicted wielding more traditional blue or green lightsabers in other media.Darth Vader (left) and Kylo Ren (right) both wield red lightsaber | IMAGE CREDIT Lucasfilm/DisneyFamous White Lightsabers: Ahsoka Tano, Orla JareniWhite Symbolism: positivity, neutrality, purity, cleanliness, beginnings, blandness, sterilityWhite Lightsaber Blade Color Meaning and HistoryA white lightsaber is achromatic, meaning the color has not hue. White lightsaber wielders are uncommonly and tend to walk their own path. Ahsoka Tano wields white lightsabers after leaving the Jedi Order. Similarly, the High Republic era Jedi Knight Orla Jareni is a Wayseeker and wields a hinged double-bladed lightsaber that emits white blades. A Wayseeker is a designation for a Jedi who serves the Jedi Order, but operates independently of the Jedi Council.Aside from Tano and Jareni, No other Jedi in Star Wars Canon are known to wield white lightsabers. In Star Wars Legends, the Imperial Knights, a group of Force-users loyal to the Emperor-in-exile Roan Fel, all wield white lightsabers.Ahsoka Tano wields a pair of two white lightsabers | IMAGE CREDIT Lucasfilm/DisneyFamous Yellow Lightsabers: Rey Skywalker, Jedi Temple Guard, VentressYellow Symbolism: energy, optimism, warmth, cowardice, caution, sunshineYellow Lightsaber Blade Color Meaning and HistoryYellow-bladed lightsabers are uncommon in Star Wars Canon. Yellow lightsabers are commonly wielded by individuals who experience a change of identity. Rey takes on the last name Skywalker and constructs a yellow-bladed lightsaber with a golden hue. The prestigious Jedi Temple Guards mask their identities and all wield yellow-bladed lightsabers with the same design. After Count Dooku betrays Ventress, she begins to walk her own path. Ventress acquires a yellow-bladed lightsaber from the black market.In Star Wars Legends, several members of the Old Republic era Eternal Empire of Zakuul wield yellow-bladed lightsabers including the twins Arcann and Thexon. The Wookiee Jedi Tyvokka and the Dark Jedi Yun wield yellow lightsabers in Star Wars Legends, too.Rey Skywalker (left) and Jedi Temple Guards (right) wields yellow lightsabers | IMAGE CREDIT Lucasfilm/DisneyFictional swordFor the song, see Lightsaber (song).LightsaberStar Wars franchise elementAnakin Skywalker's lightsaberPublisherLucasfilmFirst appearanceStar Wars: Episode IV A New Hope (1977)Created byGeorge LucasGenreScience fictionIn-universe informationTypeEnergy swordFunctionDuelingBlaster bolt deflectionCutting through solid materialsDeflecting Force lightningLight sourceAffiliationJediSithInquisitoriusKnights of RenMandalorians (Darksaber)A lightsaber is a fictional energy sword featured throughout Star Wars. A typical lightsaber is shown as a luminous laser sword about 3 feet (0.91m) in length emitted from a metal hilt around 10.5 inches (27cm) in length.[1] First introduced in the original Star Wars film,[a] it has since appeared in all 12 theatrical Star Wars films, with at least one lightsaber duel occurring in each installment of the "Skywalker saga". The lightsaber's distinct appearance was created using rotoscoping for the original films, and with digital effects for the prequel and sequel trilogies.In the Star Wars universe, the lightsaber is the signature weapon of the light-side-wielding Jedi Order and the dark-side-wielding Sith Order. However, the lightsaber can also be wielded by non-Force-sensitive characters as an ordinary weapon or tool.[2] The Jedi use different colored lightsabers. The most common lightsaber colors are blue and green, but other colors also exist, those being purple, white, black, and yellow. The Sith wield exclusively red-bladed sabers to distinguish themselves from the Jedi. The color of a lightsaber's blade is given by kyber crystals. A kyber crystal has no color until it is approached by a Jedi. It then turns into a color determined by the wielder's connection to the Force.[3] A lightsaber's hilt is built by its wielder and is, therefore, unique in design. There are several variations outside of the traditional single-bladed lightsaber, such as the double-bladed lightsaber (most famously wielded by Darth Maul), the curved-hilted lightsaber (wielded by Asajj Ventress and most famously by Count Dooku), crossguard lightsabers (used by Kylo Ren and occasionally by Jedi), and the Darksaber, forged by the Mandalorian Jedi Tarre Vizsla, but primarily wielded by the non-Force-sensitive Mandalorian rulers of Mandalore (including Pre Vizsla, Maul, Bo-Katan Kryze, Moff Gideon, and Din Djarin).As presented in the early films, a lightsaber's energy blade can cut, burn, and melt through most substances with little resistance.[4] It leaves cauterized wounds in flesh, but can be deflected by another lightsaber blade, by energy shields, or by the metal beskar (found in Mandalorian armor) and phrik (the metal used to create electrostaffs). The blade has even been used as a tool to weld metal. Other times, the lightsaber has been shown to cause bleeding wounds in the flesh, sometimes accompanied by burns. Some exotic saber-proof melee weapons have been introduced in the Expanded Universe as well as later episodic films. Lightsabers can also deflect blaster bolts, allowing a wielder with Jedi reflexes to turn an enemy's own gunfire against them. An active lightsaber gives off a distinctive hum, which rises in pitch and volume as the blade is moved rapidly through the air. Bringing the blade into contact with another lightsaber's blade produces a loud crackle.The lightsaber has become one of the most widely recognized elements of the Star Wars franchise. In 2008, a survey of approximately 2,000 film fans found it to be the most popular weapon in film history.[5][6]Covered with millions of tiny glass beads, [Scotchlite] has the property of reflecting light directly back to its source. It's the same material used for reflective road signs [and lightsaber props].Special Effects: An Introduction to Movie Magic[7]For the original Star Wars film, the film prop hilts were constructed by Roger Christian from old Graflex press camera flash battery packs and other pieces of hardware,[8] while special effects that brought the blade to life on screen were made by John Stears. The full-sized sword props were designed to appear ignited onscreen, by later creating an "in-camera" glowing effect in post-production. The blade is a three-sided rod which was coated with a Scotchlite retroreflector array, the same sort used for highway signs.[7] A lamp was positioned to the side of the taking camera and reflected towards the subject through 45-degree angled glass so that the sword would appear to glow from the camera's point of view.Set decorator Roger Christian found the handles for the Graflex Flash Gun in a photography shop in Great Marlborough Street, in London's West End.[9] He then added cabinet T-track to the handles, securely attaching them with cyanoacrylate glue. Adding a few "greebles" (surface details), Christian managed to hand-make the first prototype of a lightsaber prop for Luke Skywalker before production began. George Lucas decided he wanted to add a clip to the handle, so that Luke could hang it on his belt. Once Lucas felt the handle was up to his standards, it went to John Stears to create the wooden dowel rod with front-projection paint so that the animators would have a glow of light to enhance later on in post production. Due to lack of preparation time, Christian's prototype and a second spare were used for the shooting in Tunisia, where filming on Star Wars began.[10] It was discovered, however, that the glowing effect was greatly dependent on the rod's orientation to the camera, and during the Obi-Wan Kenobi/Darth Vader duel, they could clearly be seen as rods. Because of this, the glow would be added in post-production through rotoscoping, which also allowed for diffusion to be employed to enhance the glow.While original trilogy hilts were typically constructed using found parts, during the prequel and sequel trilogies a different process was sometimes used. Hilts were first machined out of metal materials. Then casts would be made using the metal hilts to create resin copies that were used on screen.[11] The resin was often molded over a metal rod that a dueling blade could be attached to for fight sequences.Korean animator Nelson Shin, who was working for DePatieFreleng Enterprises at the time, was asked by his manager if he could animate the lightsaber in the live-action scenes of a film. After Shin accepted the assignment, the live-action footage was given to him. He drew the lightsabers with a rotoscope, an animation which was superimposed onto the footage of the physical lightsaber blade prop. Shin explained to the people from Lucasfilm that since a lightsaber is made of light, the sword should look "a little shaky" like a fluorescent tube. He suggested inserting one frame that was much lighter than the others while printing the film on an optical printer, making the light seem to vibrate. Shin also recommended adding a degausser sound on top of the other sounds for the weapon since the sound would be reminiscent of a magnetic field. The whole process took one week, surprising his company. Lucasfilm showed Shin the finished product, having followed his suggestions to use an X-Acto knife to give the lightsaber a very sharp look, and to have sound accompany the weapon's movements.[12]The lightsaber sound effect was developed by sound designer Ben Burtt as a combination of the hum of idling interlock motors in aged movie projectors and interference caused by a television set on a shieldless microphone. Burtt discovered the latter accidentally as he was looking for a buzzing, sparking sound to add to the projector-motor hum.[13]The pitch changes of lightsaber movement were produced by playing the basic lightsaber tone on a loudspeaker and recording it on a moving microphone, generating Doppler shift to mimic a moving sound source.[14]Lightsabers were present in the earliest drafts as mundane plasma weapons that were used alongside laser guns.[15][16] The introduction of the Force in a later revision made the Jedi and the Sith supernaturally skilled; initially, they were only portrayed as swordsmen.[17] The lightsaber became the Force-user's tool, described in A New Hope by Obi-Wan Kenobi as "not as clumsy or random as a blaster. An elegant weapon, from a more civilized age".[18] The source of a lightsaber's power is a kyber crystal.[19] These crystals are also the power source of the Death Star's superlaser.[20][21]In films such as Revenge of the Sith and The Last Jedi, melee weapons such as the electrostaff and plasma-lined blades deflect lightsabers.[22][23]Lightsabers are depicted as hand-built as part of a Jedi's or Sith's training regimen. Each lightsaber is unique, though some may bear resemblance to others, especially if there is a connection between the builders. The hilt of most lightsabers are straight and predominantly cylindrical, though there are other lightsaber hilt types. The first film appearance of a dual-bladed lightsaber (first depicted in the comic series Tales of the Jedi) was in The Phantom Menace, wielded by Darth Maul; it consists of two regular lightsabers joined at their butt ends each producing a blade independently. Count Dooku, beginning with the character's first appearance in Attack of the Clones, is shown to have a lightsaber with a curved hilt. The video game Star Wars: The Force Unleashed introduced two other variants: a lightsaber pike (a lightsaber with a shorter blade but a long handle, resembling a spear) and a Tonfa-style lightsaber with right-angle hilt. Additionally, in several spin-off series such as The Clone Wars and Rebels, special variants of the lightsaber have been depicted - such as the lightsaber-blaster wielded by Ezra Bridger. The Star Wars expanded universe adds several lightsaber types, including short[24] and dual-phase (adjustable length) weapons.[25][26] In Star Wars Rebels, Ezra Bridger's original lightsaber is a hybrid that features a fully functional blaster pistol built into the handle. Kylo Ren, introduced in The Force Awakens, uses a lightsaber that features two crosshilt blades, giving it the appearance of a greatsword. His blade also has an unstable, fiery appearance, explained in canon reference books as stemming from a cracked kyber crystal.[27] The Inquisitors of the Galactic Empire are depicted as wielding a unique variation of a double-bladed saber, mounted on a rotating ring enabling the blades 360 degrees of rotation and short-term flight capability. More obscure lightsaber variations, such as the "lightwhip", an elongated flexible blade used in a manner akin to a whip, the "lightclub", an enlarged standard lightsaber, and the "shoto", a dramatically smaller variation often paired with a standard sized saber have also made appearances.Lightsabers in the first two released films, A New Hope and The Empire Strikes Back, had blades that were either blue (for the Jedi) or red (for the Sith). Luke Skywalker's new lightsaber in Return of the Jedi was colored blue during the initial editing of the film, and appears so in both an early movie trailer and the official theatrical posters; it was later changed to green in the film's final edit after initial viewings and screen tests by the filmmakers, who felt that it would better stand out against the blue sky of Tatooine in outdoor scenes, and this color change is also reflected in the film's re-release posters. Mace Windu's purple-bladed lightsaber, as first seen in Attack of the Clones, was requested by the actor Samuel L. Jackson, who believed the color, which is his personal favorite, would make his character be easily recognized among other Jedi.[b] Jackson is known to frequently request that the characters he plays use an item that is purple in color.[30] The Clone Wars showed the guardians of the Jedi Temple wielding yellow-bladed lightsabers, and, at the end of The Rise of Skywalker, Rey is shown to have built a yellow-bladed lightsaber using part of her staff as the hilt.As depicted in The Clone Wars and Rebels, the builder of a lightsaber finds a kyber crystal and meditates with it until the crystal acquires a color. The color of this crystal becomes the blade's color when installed into a lightsaber hilt. In the book Star Wars: Ahsoka and the comic series Darth Vader: Dark Lord of the Sith, it is shown that dark side users remove the crystal from a defeated Jedi's lightsaber and concentrate Force energy on it to break its connection to the light side, a process known as "bleeding" to create a red crystal. The process can also be reversed, as shown in Ahsoka, when the titular character does so to a pair of crystals taken from an Inquisitor. She uses them in the pair of white-bladed lightsabers she builds at the end of the novel.Other colors have appeared in various expanded media projects, including many video games where the player can select their character's lightsaber color.The Darksaber is a unique lightsaber that has a distinct black blade with a white halo, introduced in Star Wars: The Clone Wars (2008) and subsequently appearing in Star Wars Rebels, where it is described as an ancient lightsaber created by Tarre Vizla, the first Mandalorian to become a Jedi, and later serves as a symbol of Mandalorian authority in the hands of Bo-Katan Kryze. According to Mandalorian tradition, the weapon cannot simply be given; it must be won from a defeated combatant. It subsequently appears briefly in the hands of Moff Gideon in the season one finale of The Mandalorian, to whom Kryze had previously surrendered the weapon.[31][32][33] By the end of the second season's finale, it belongs to series protagonist Din Djarin, who has bested Gideon for it. In the second episode of the third season of the show, the weapon (nominally) returns to Kryze's ownership, after she defeats a cyborg creature that captures Djarin (it remains in Din Djarin's possession, however), and she officially reclaims the blade in the season's sixth episode. It is destroyed by Gideon in the third season finale.The technical lightsaber choreography for the original Star Wars trilogy was developed by Hollywood sword-master Bob Anderson. Anderson personally trained Mark Hamill (Luke Skywalker) and, in The Empire Strikes Back and Return of the Jedi, performed all the stunts as Darth Vader during the lightsaber duels wearing Vader's costume. Anderson's role in the trilogy was highlighted in the film Reclaiming the Blade where he shared his experiences as a fencer developing the lightsaber techniques for the three original movies.The lightsaber duels in the Star Wars prequel trilogy were specifically choreographed by stunt-coordinator Nick Gillard to be miniature "stories". For these films, Gillard was the primary sword instructor for Liam Neeson (Qui-Gon Jinn), Ewan McGregor (Obi-Wan Kenobi), Ray Park (Darth Maul) and Hayden Christensen (Anakin Skywalker / Darth Vader) among other actors. His goal in choreographing the action for The Phantom Menace was to create stunts that flow from the story; "You can't just think, 'I'm a stunt coordinator, I'm going to make a big stunt happen'," Gillard said. "It's all about making it tie in nicely with the film so that you don't notice the stunts."[citation needed]In writing the prequel trilogy, George Lucas said he wanted the lightsaber combat to be "reminiscent of what had been done in the previous films but also something that was more energized. We'd seen old men, young boys, and characters who were half-droid, but we'd never seen a Jedi in his prime. I wanted to do that with a fight that was faster and more dynamicand we were able to pull that off."[34]According to Gillard, various lightsaber combat styles, or forms, were devised for the prequels and intended to further characterize their practitioners.I developed different styles for the characters, and gave each of them a flaw or a bonus. So with Obi-Wan Kenobi, for instance, he's got a very business-like stylewhen he was younger he could border on the flashy and might twirl his lightsaber a bit, because he was taught by Qui-Gon. Qui-Gon was brash, that rubbed off on Obi-Wan and Obi-Wan then taught Anakin, who was way too old to learn anyway... I think the style really worked well. The Jedi style of fighting is an amalgamation of all the great swordfighting styles. Melding them together is the difficult partto move from a Kendo style to, say, rapier requires a complete change in body and feet movement, and this must look effortless. The style moves seamlessly between the different disciplines, but remains technically correct throughout.[35]For The Phantom Menace, Gillard set out certain styles and faults for the saber-wielding characters.[36] He added that the Jedi's use of such "a short-range weapon" meant "they would have to be very good at it"; combining a variety of disciplines from various sword fighting styles to martial arts "with a touch of tennis and tree chopping", he created the style seen in the Episode I lightsaber battles.[37]For The Force Awakens, director J. J. Abrams decided to approach the choreography similarly to how it was done in the original trilogy. Abrams stated that the prequel trilogy choreography was "increasingly spectacular and stylized, almost like dance choreography", but that was not what they really wanted to go for in the new films.[38] He told Empire magazine, "When you look at Star Wars and Empire, they are very different lightsaber battles, but for me they felt more powerful because they were not quite as slick. I was hoping to go for something much more primitive, aggressive and rougher, a throwback to the kind of heart-stopping lightsaber fights I remembered being so enthralled by as a kid."[38]Lightsaber chopsticksSee also: Cultural impact of Star WarsOver the years, advancements in technology have allowed for the creation of increasingly immersive and realistic lightsaber replicas.Disneyland in California sells lightsaber-themed churros outside its Star Tours attraction.[39]Disneyland and Disney World (Hollywood Studios) also sell legacy lightsabers which are replicas of the lightsabers seen used by the Jedi, Sith, and other warriors in the movies and television shows such as Darth Vader, Obi-Wan Kenobi, Rey Skywalker, Count Dooku, and Kylo Ren.[40][41]Disneyland and Hollywood Studios also offer Savi's Workshop, a place where guests can build their own lightsaber and choose their own kyber crystal, thereby changing the blade color of their own unique lightsaber.[42][43][44]Besides Savi's Workshop, there is another custom lightsaber experience. The Star Trader at Disneyland offers guests a chance to build their own lightsabers, without first paying 200 dollars for the experience.[45]The Jedi Training: Trials of the Temple is a live show where children are selected to learn the teachings of the Jedi Knights, the Force, and the basics of Lightsaber combat to become Padawan learners. The show is present at the Rebels stage next to Star Tours The Adventures Continue attraction at Disney's Hollywood Studios and at the Tomorrowland Terrace at Disneyland.Additionally, Star Wars: Galactic Starcruiser has incorporated lightsaber training for each guest aboard the spacecraft during their stay. The training is led by the Saja cast members and teaches the fourth form of lightsaber combat, Ataru, to the guests. Both lightsabers and shields are used during training since the guests learn to use Ataru to deflect incoming projectiles. There is no lightsaber-to-lightsaber combat in this attraction and guests must be at least seven years old to participate.[46]The virtual reality rhythm game Beat Saber involves the player using two lightsabers in order to slash a series of oncoming cubes.[47]In Kamen Rider Black RX, the main character, Rider RX also known as Kotaro Minami, uses his lightsaber-ish weapon "Revolcane" to fight the Crisis Empire, a terrorist organization.In Saban's Masked Rider, the main character, known as Dex Stewart, uses his lightsaber-ish weapon "Electro Saber" to fight Masked Rider's foes.[citation needed]In the 1987 film Spaceballs by Mel Brooks, "the Schwartz" is a play on "the Force", from Star Wars. The lightsabers emanate from the Schwartz-rings, rather than a hilt. The cartoon series Futurama features many lightsaber-style weapons, notably expanding batons used by police. The batons glow and "whoosh" with a lightsaber's distinctive hum, but are used to beat people. In Jim Butcher's Dresden Files novel series, medical examiner and Star Wars fan Waldo Butters wields one of the three holy Swords of the Cross, which re-fashions itself into a lightsaber upon accepting him as its owner. In Yuya Sato's Danganronpa: Togami light novel trilogy, main antagonist Orvin Elevator / Kazuya Togami wields a lightsaber built into their prosthetic arm, to which they are berated for copyright infringement by Genocider Syo / Genocide Jack; in the anime Danganronpa 3: The End of Hope's Peak High School, this same lightsaber is instead depicted as a flaming mechanical katana wielded by Kyosuke Munakata.With the advent of motion-controlled video games, players were given the opportunity to wield an in-game lightsaber with their own hands. In the seventh generation of video game consoles, there were several Star Wars video games available on the Wii (Lego Star Wars: The Complete Saga, Star Wars: The Force Unleashed, Star Wars: The Clone Wars Lightsaber Duels, Star Wars: The Clone Wars Republic Heroes and Lego Star Wars III: The Clone Wars) and one on the Xbox 360 (Kinect Star Wars) that utilized motion controls to wield a lightsaber through arm gestures. Unleashed and Duels, both developed by Krome Studios, have more precise control of the lightsaber, allowing players to swing it in any of five different directions (up, down, left, right or forward) with the Wii Remote, while Kinect takes advantage of the eponymous, camera-based motion controller to grant the player a more fluid, one-to-one control method of swinging the lightsaber.Prior to the seventh generation, there were also a few earlier Star Wars games that used gesture-based control to simulate lightsaber combat, such as the two bonus levels of the arcade game Star Wars Trilogy, where the player controls Luke Skywalker as he wields his lightsaber against Boba Fett and Darth Vader in Return of the Jedi by pushing a joystick in one of eight directions to follow on-screen offensive and defensive cues,[48] and a TV game released around the time Revenge of the Sith came to theaters, titled Star Wars: Saga Edition Lightsaber Battle Game, in which the player swings a lightsaber-shaped controller to deflect blaster bolts from infantry (such as battle droids and clone troopers) and duel against characters from across the saga.By the time Disney purchased Lucasfilm, new technological advances made augmented reality possible, leading to the creation of some more notable motion-controlled lightsaber video games that took advantage of that feature. One of them came in the form of a special activity mode in the official Star Wars fan app on iOS and Android in which players use their smartphone's motion sensors to practice and master blaster deflection with a training droid (which appears on the phone's rear camera), similar to the deflection training exercises featured aboard the Millennium Falcon in A New Hope, while progressing through the ranks of the Jedi or Sith order. Another is in Star Wars: Jedi Challenges, which works with a Lenovo Mirage AR headset, a tracking sensor and a dedicated lightsaber controller that launched in December 2017. One of the multiple game modes available in Challenges, which was jointly developed by Disney and Lenovo, enables players to confront Star Wars villains in lightsaber duels, such as Darth Maul and Kylo Ren.[49]Speculative fiction portalFilm portalFlaming sword (mythology)List of Star Wars weaponsPhysics and Star WarsPhotonic moleculeStar Wars: Evolution of the Lightsaber DuelFootnotes^ Later titled Star Wars: Episode IV A New Hope^ Ki-Adi-Mundi and Saesee Tiin had previously been depicted in spin-off works with purple lightsabers.[28][29]Citations^ "Star Wars A New Hope prop light sabre". Retrieved October 23, 2017.Wikimedia Commons has media related to Lightsabers.Lightsaber in the StarWars.com DatabankLightsaber on Wookieepedia, a Star Wars wiki"Howstuffworks Inside the Lightsaber"Scientists Could Create Real LightsabersRetrieved from " The lightsaber has become an iconic weapon that shows up in most Star Wars movies. Both the protagonist Jedi and antagonist Sith regimes use them. A lightsabers usual construction is about 3 feet long and emits metal plasma from its sheath. Each character does add their personal touches to the design to make it fit their battling preferences and abilities. Color variations of light sabers include green, blue, white, purple and yellow. These colors contrast the color used by the Sith force, which is led by Darth Vader. The evil Sith side consistently uses red lightsabers. For other characters in Star Wars universe, lightsaber color is more variable. Luke Skywalker is the hero and main protagonist in the first three Star Wars films produced by George Lucas. He wielded three lightsabers over the course of the Star Wars franchise. The first lightsaber Luke Skywalker wielded was blue. Lukes blue lightsaber appeared in the firstStar Wars (1977) film, retroactively titled Star Wars: Episode IV A New Hope in 1981. Luke inherited the blue lightsaber and the Luke lightsaber color became the Skywalker lightsaber color and a signature color of the Jedi. In Star Wars comics, many characters have wielded lightsaber colors they havent yielded on screen. In Marvel comic book Star Wars #6, Luke Skywalker first wielded a yellow lightsaber he discovered in a Jedi outpost on Tempes in the Outer Rim Territories. Lukes green lightsaber was first wielded in Star Wars: Episode VI Return of the Jedi (1983). While the storyline sees Luke building a new lightsaber, the lightsaber was never meant to be green. Promotional materials and an early movie trailer showed Luke wielding a blue lightsaber as usual, but when the film was released Lukes lightsaber was green. The new green color was chosen because it showed up better against the blue sky. Now, its canon, and one of the main colors that distinguishes the Jedi regime. Darth Vader is the villain and main antagonist in the first three Star Wars films A New Hope, The Empire Strikes Back, and Return of the Jedi. He wielded only one lightsaber over the course of the Star Wars franchise. Red is the color of the Sith empire, and the only color lightsaber Darth Vader wields. Darth Vaders red lightsaber appears in the first three Star Wars movies, as well as in Star Wars video games and comic books. While Darth Vaders lightsaber never changed color, it did look slightly different throughout the Star Wars franchise as Vader made upgrades and improvements to his weapon. Yoda is a Jedi Master and mentor to Luke Skywalker who first appeared in the The Empire Strikes Back (1980) and has appeared in every Star Wars film since. He wielded only one lightsaber over the course of the Star Wars franchise. Yodas green lightsaber first appears in Star Wars: Episode II Attack of the Clones. Due to his small size, Yodas green saber is built shorter than other lightsabers, with a reduced hilt and blade, categorizing it as a shoto or lightdagger. After its original appearance, Yodas green saber featured heavily in The Clone Wars,as well as in video games, novels and comics. Obi-Wan Kenobi is a Jedi Master and mentor to Luke and Anakin Skywalker who appeared in the original and prequel Star Wars trilogies, as well as in The Clone Wars, games, and comics. Obi-Wan has wielded three lightsabers over the course of the Star Wars franchise. Although Obi Wan has wielded three separate lightsabers, all of his sabers have featured blue blades. Obi-Wans original blue lightsaber first appeared in The Phantom Menace. Rey is a Jedi Master and granddaughter of Darth Sidious. She appeared in the Star Wars sequel trilogy, as well as in video games, books, and comics. Rey wielded two lightsabers in the Star Wars universe. Rey created her yellow lightsaber herself. She revealed it on Tattoine, shortly before taking up the name of Skywalker. Luke Skywalker had also wielded a yellow blade in the Star Wars universe, cementing the yellow lightsaber as a Jedi and Skywalker staple. Reys yellow lightsaber first appeared in Star Wars Episode IX: The Rise of Skywalker (2019). The blue lightsaber Rey wielded was actually the original lightsaber of Anakin Skywalker, which was passed down to Luke Skywalker, who lost it, along with his hand, in a battle with Darth Vader. Rey found it, wielded it to defeat Kylo Ren, and attempted to return it to Luke, then carried it herself when Luke didnt want it. The original Skywalker saber was finally destroyed in battle, but Rey rebuilt it and continued to use it as her primary saber. Kylo Ren is the alter ego of Jedi Ben Solo. As Kylo, he was master of the Knights of Ren. He appeared in the Star Wars sequel trilogy, as well as in video games, books, and comics. Kylo Ren/Ben Solo has wielded two lightsabers over the course of the Star Wars franchise. The first lightsaber Ben Solo crafted was as a Padawan under the mentorship of his Uncle Luke Skywalker. Like other Skywalker sabers, the blade was blue. Bens blue lightsaber first appeared in Star Wars: Episode VII The Last Jedi, after the first appearance of his red blade. After renouncing the dark side, Ben wielded the Skywalker lightsaber, which also had a blue blade. When Ben Solo went to the dark side, he altered the energy of his lightsaber and the blade turned red. Kylo Rens red lightsaber first appeared in Star Wars: Episode VII The Force Awakens, before the revelation of his blue lightsaber. Anakin Skywalker is a Jedi Knight and Chosen One of the Jedi Order. He appears in the original Star Wars trilogy as Darth Vader and the prequel trilogy. Anakin wielded two lightsabers before going to the dark side. Like all Skywalker lightsabers, Anakin Skywalkers lightsabers had blue blades. Anakins original blue saber first appeared in Star Wars: Episode II Attack of the Clones. Anakin wielded one additional lightsaber during the franchise. Anakins green lightsaber was never really his, though, but borrowed during battle. After his own (blue) lightsaber is taken and he is set to be executed, the Jedis come to the rescue, tossing Anakin a lightsaber with which to fight. The saber is green, and he wields it for the rest of the film. Darth Maul is a Dark Lord of the Sith and Galactic Empire crime lord who appeared in Star Wars: Episode I The Phantom Menace and The Clone Wars, as well as in video games, books and comics. Maul wielded only one lightsaber in the Star Wars universe. Red is the color of the Sith empire, and the only color lightsaber Darth Maul wields. It first appears in The Phantom Menace. Mace Windu is a Jedi Master who served on the Jedi High Council of the Galactic Republic. He appeared in the Star Wars trilogy prequel, as well as in video games, books and comics. Windu wielded only one lightsaber in the Star Wars universe. Mace Windu crafted his purple lightsaber (though its billed as amethyst in the Star Wars verse) after becoming a member of the Jedi High Council. Windus purple lightsaber first appeared in Star Wars: Episode II Attack of the Clones. Ahsoka Tano is a rebel leader and former Jedi Padawan of Anakin Skywalker. She appeared in Star Wars: The Clone Wars, Star Wars: The Rise of Skywalker, and The Mandalorian, as well as in comics and books. Tano wielded three lightsabers in the Star Wars universe. Ahsoka Tano crafted her first lightsaber from the kyber crystal she earned at a Jedi Order Gathering. The saber featured a green blade. A green lightsaber was another signature Jedi color. After Tano started studying JarKai, she traveled back to Ilum, where she had received her first crystal, for another kyber crystal. With it, she built a complementary shoto lightsaber with a yellow-green blade. Ahsoka Tanos main lightsabers underwent a color change when she left the Jedi Order after being falsely accused of a crime. Luke Skywalker tinkered with her sabers while they were in his possession, and the blades became Skywalker blue. Ahsoka wielded yet two more lightsabers during the Star Wars franchise. Ahsokas white lightsabers she crafted after leaving the Jedi order. They had curved hilts, and were designed to use in tandem. Count Dooku was a Jedi Master who was went to the dark side and became Darth Tyranus, a Dark Lord of the Sith. He appeared in Star Wars: Attack of the Clones, Star Wars: Revenge of the Sith, The Clone Wars film and subsequent TV shows. He wielded one lightsaber with two different colors of blade in the Star Wars universe. Count Dooku designed his own lightsaber when he was still a Jedi. While he was part of the Jedi Order, the blade burned blue. Once Count Dooku became a Sith lord, the blade of his saber turned red. Darth Revan was a Jedi Knight who turned to the Dark Side to become a Sith Lord, only to betray the Siths in order to help the Jedis. His first appearance was in the 2003 video game Star Wars: Knights of the Old Republic. His first film appearance was in Star Wars: Episode IX The Rise of Skywalker. The first lightsaber Darth Revan crafted as a Jedi has a blue blade. After defeating Darth Malak, and while still a Jedi, Revan changed the blade of his saber to blue. After being captured by the Emperor and imprisoned in a stasis chamber for 300 years, Revans lightsaber changed to violet upon his release. When he turned to the dark side, Revan replaced the crystal in his saber to turn the blade red the signature color of the Sith. Cant get enough about lightsabers? Check out A Guide to Star Wars Lightsaber Colors. Organization in the Star Wars seriesThis article is about a fictional organization in Star Wars. The Sith Order is depicted as an ancient cult of warriors who draw strength from the dark side of the Force and use it to seize power by any means necessary, including terrorism and mass murder with the goal to destroy the Jedi and rule the galaxy.The antagonistic factions in the franchise include the Confederacy of Independent Systems, the Galactic Empire, the Imperial Remnant, and the First Order, all of whom originated from the Sith. Sith, known as Sith Lords, are by nature ruthless. At any point an individual can assume absolute authority amongst their kind and be granted the honorific Dark Lord of the Sith. Sith culture is based on perpetual treachery and betrayal. The fate of Sith Lords is to be killed and replaced by their own apprentices. Sith teach their apprentices to revere the dark side of the Force, to give full rein to aggressive emotions of rage and hatred, and to believe that others are expendable in the pursuit of power, thus making the Lords' demise inevitable.Like the Jedi, the Sith use the lightsaber as their traditional weapon, a device that generates a blade-like plasma powered by a kyber crystal. In contrast to the Jedi, who use blue and green lightsabers, the usual color for a Sith lightsaber is red, born of an unnatural corruption of the kyber crystal through the dark side's malignancy, causing it to "bleed," which affects the sound of ignition with a harsher hiss.One thousand years before the Galactic Civil War, the Sith nearly became extinct at the Battle of Ruusan. Still, they continued to precariously exist as two Dark Lords at one time: a master and an apprentice.The word Sith is most likely derived from the 1914 science fiction novel, The Warlord of Mars, by Edgar Rice Burroughs, in which it refers to a species of beetle. Another possible derivation is the Scottish Gaelic word sith, which refers to a type of spirit or fairy.The word itself was first used for Star Wars in the 1974 rough cut of Star Wars[3] with the first published use being the 1976 novelization of Star Wars as a title for the villain Darth Vader, the "Dark Lord of the Sith". Sith characters had also been portrayed as such in some Star Wars Legends works prior to the release of The Phantom Menace (the first film to identify characters as Sith on-screen), and in deleted footage from the original film.In his novel series The Thrawn Trilogy (19911993), author Timothy Zahn labeled Darth Vader and Emperor Palpatine as "Dark Jedi", as the meaning of the term "Sith" had not yet been defined. Subsequent Star Wars Legends media use the term "Dark Jedi" for various characters attuned to the dark side of the Force. Some of these characters (including Vader and Palpatine) would be later identified as Sith, although the term would also be applied to non-Sith characters with similar goals and practices.The word "sith" appears natively in older English with the meaning of "journey," "experience" or "point in time"[4] and, as such, is related to the word "send" and was commonly used until the 16th Century.Main articles: Star Wars sources and analogues and Star Wars ThemesGeorge Lucas has acknowledged that many sources have inspired the concepts of the Jedi, Sith, and the Force. These include: knighthood, chivalry, paladinism, samurai bushido, Shaolin Monastery, Feudalism, Hinduism, Qigong, Greek philosophy and mythology, Roman history and mythology, Sufism, Confucianism, Shint, Buddhism and Taoism, and numerous cinematic precursors. The works of philosopher Friedrich Nietzsche and mythologist Joseph Campbell, especially his book The Hero with a Thousand Faces (1949), directly influenced Lucas, and was what drove him to create the 'modern myth' of Star Wars.[5][6] In particular, the contrasting narrative relationship between the dark side-using Sith and light side-using Jedi mirrors several modern and classical literary tropes.The ongoing struggle of the humanistic "light side"-affiliated Jedi to permanently defeat the egoistic "dark side"-affiliated Sith is framed not only as a contest of values, but as a deep metaphysical conflict: The dark side of the Force is viewed by the Jedi, and generally represented within Star Wars media, as not only a dangerous expedient but as a form of existential corruption which must be purged for the universe, or a person, to attain spiritual balance.[7] Jedi are often depicted as imperfect individuals, but their cause of selfless heroism is ultimately on the right side of an inexorable cosmic struggle against evil, embodied in the power-hungry Sith and the dark side of the Force.The dualistic relationship between these Sith and Jedi concepts of "purity" mirrors the philosophical and literary concept of "Apollonian and Dionysian": the Jedi are portrayed as embracing purity, reason, temperance, altruism and other humanistic virtues; the Sith, by contrast, embrace curiosity, emotion, conflict, power, instincts, unfettered self-interest and other hedonistic vices. However, whereas the classic Greek concept did not necessarily view the Apollonian and Dionysian principles as opposed, Star Wars frames the Jedi and Sith as opponents in a dire moral struggle, with the Sith cast as corrupted villains apparently destined to defeat or self-destruction in the end.[8] The Greek analogy also makes clear that the conflict between the Jedi and the Sith reflects the universe's eternal dichotomy between order (Apollonian) and chaos (Dionysian). Ironically, the Sith, and the Imperials generally, believe in an extreme social conservatism for sentient beings at large, enforcing order on society through brutal authoritarianism. However, the individual Sith soul is chaotic: a Sith is never at peace, wracked by jealousy and paranoia until he or she has achieved ultimate supremacy.Within the Star Wars narrative, the Jedi and Sith naturally have differing understandings of the Force. In Sith rhetoric, the relationship between the philosophy of Jedi versus Sith closely mirrors German philosopher Friedrich Nietzsche's concept of masterslave morality; Sith value "master" virtues, such as pride and power, whereas the Jedi value altruistic "slave" virtues like kindness and compassion.[9] The goal of the Sith is tangible greatness: the ability to shape or destroy a world according to one's will alone. The goal of the Jedi is moral goodness: freedom from inner turmoil and selfish desires. However, the Sith consider the Jedi's aspirations to be either hopeless or pathetic. To the Sith, achieving greater power, following one's passion, and freedom from inhibition are more authentic ways of expressing the Force. While the Jedi strive for a harmonious connection to the Force, the Sith seek a deeper understanding through conflict, as they believe the Force is defined by it.[10]Originally, George Lucas conceived the Sith as an army of fanatical soldiers that served the Emperor in the same way that the Schutzstaffel had served Adolf Hitler. In developing the history for The Empire Strikes Back, Lucas condensed this into one character in the form of Darth Vader.[11]Sith philosophy values conflict as a catalyst for growth and as a means to purging the weak, disloyal, and undisciplined. Sith emphasize the maxims, "because we feel like it" and "survival of the fittest" and view restraint as a weakness. Members adhere to master morality, are characterized by the desire to seize power by any means necessary, leveraging force (both physical and supernatural), social maneuvering, and political cunning to their advantage.[9]Throughout Star Wars media and in popular culture, the Sith are infamous as the dualistic antagonists to the Jedi, an affiliation of altruistic warriors who strive to use their own martial training and connection to the "light side" of the Force to promote peace and the common welfare throughout the galaxy. To counteract the Jedi's benevolent influence, the Sith instigate both large and small-scale conflicts as part of their larger plan to destabilize the Republic and eventually take control of the galaxy.The Sith are dedicated to the "Code of the Sith" and to mastering the dark side of the Force.[2] The Code of the Sith identifies conflict as the fundamental dynamic of reality, and holds that the search for lasting peace, within or without, is both quixotic and misguided. Rather, Sith embrace strife and dark passion as salutary and emancipatory forces, as they believe that violent struggle purges the decadent and weak, and that emotions such as aggression and hate provide the strength and resolve to secure freedom through victory.The Code:Peace is a lie. There is only passion.Through passion I gain strength.Through strength I gain power.Through power I gain victory.Through victory my chains are broken.The Force shall free me.The Code of the Sith[12]Although Sith seek dominion, Sith philosophy stresses that power belongs only to those with the strength, cunning, and ruthlessness to maintain it, and thus "betrayal" among the Sith is not a vice but an endorsed norm. Accordingly, the Sith reject altruism, self-denial, and kindness, as they regard such attitudes as founded on delusions that fetter one's perceptions and power. In connection with their philosophy, the Sith draw on the dark side of the Force through severe negative emotions, a technique opposed to that of their archenemies, the Jedi, who rely on the Force's "light side," i.e., the Force as experienced through disciplined states of apathy. Notably, both the Jedi and Sith shun romantic and familial love, as well as other positive emotions; the Jedi fear that such love will lead to attachment, and thus selfishness, while the Sith fear it will compromise their ruthlessness and connection to the dark side of the Force. Although the Sith are intimately linked to the dark side, not every user of the dark side is a Sith, nor is every user of the light side a Jedi.Yes, a Jedis strength flows from the Force. But beware of the dark side. Anger, fear, aggression; the dark side of the Force are they. Easily they flow, quick to join you in a fight. If once you start down the dark path, forever will it dominate your destiny, consume you it will, as it did Obi-Wan's apprentice.Yoda, in The Empire Strikes BackThe dark side of the Force is stigmatized as seductive, corruptive, and addictive by the Jedi, who view it as evil,[13] whereas the Sith consider the dark side of the Force to be its most powerful manifestation, and regard the abstemious Jedi as blinded by false virtue. As portrayed in all Star Wars-related media, the dark side provides users with powers similar to those of the light side-using Jedi, but as it leverages passion and violence, its use is enhanced by negative raw and aggressive emotions and instinctual feelings such as anger, greed, hatred, and rage. By deciding to learn the ways of the dark side of the Force, the Sith may also acquire powers and abilities considered by some in the Star Wars universe to be unnatural. A notable example is "Force lightning", electricity projected from the fingertips as a means of attack and torture, most famously used by Darth Sidious to torture Luke Skywalker in Star Wars Episode VI: Return of the Jedi. In Star Wars Episode III: Revenge of the Sith, meanwhile, Palpatine claims that the dark side gave the Sith Lord Darth Plagueis power over death itself. Being uninhibited in their use of the Force, Sith could also repurpose abilities shared with the Jedi, such as telekinesis, to new and terrifying effect: Darth Vader was infamous for his use of telekinetic strangulation, or "Force choke," as a means of execution or intimidation. He even went so far as to murder individuals with his power, including at least two Imperial officers and his own wife, Padme Amidala (though it is unclear if Padme's death was caused directly by the choke)."Fear is the path to the dark side. Fear leads to anger, anger leads to hate, hate leads to suffering."Yoda, in The Phantom MenaceExtended use of the dark side reshapes the user's very nature, resulting in a loss of humanity, morality, and the ability to love, leaving every Sith, to varying degrees, amoral, cruel, and violent. Considering this dark change in personality to be a transformation into a different person altogether, some who turn to the dark side take on a different name, as they regard their former persona as dead and destroyed. Sith Lords, in particular, adopt a new name upon their initiation into the Order, prefixing it with the title Darth (e.g., "Darth Vader"). Severe saturation in the dark side may even lead to physical degradation. It is common for Sith who have immersed themselves in the dark side to have yellow eyes and pale skin, as evidenced by Darth Sidious in Return of the Jedi and the newly corrupted Vader in Revenge of the Sith.[14] Although Sith are deeply affected by the methods and dark arts they practice, they are not portrayed as necessarily irredeemable: some Sith, most famously Darth Vader in the final moments of his life, have renounced the Order and the dark side of the Force.Martial arts are a core part of the Sith tradition, and Sith featured in the Star Wars film series have all been highly trained warriors who further augment their abilities with the Force. Like the Jedi, the Sith's signature armament is a lethal focused energy melee weapon known as a lightsaber, which (generally) only those trained in the ways of the Force can use effectively, although General Grievous, a non-Force user, is able to murder numerous Jedi and seize their lightsabers as trophies. Sith use lightsabers in combination with Force-derived powers, such as telekinesis, enhanced dexterity and precognition, to achieve superhuman combat prowess. A well-trained Sith is depicted as being at least a match for a well-trained Jedi Knight, and either can handily defeat multiple ordinary attackers. In matters of dress, Sith may adopt any attire consistent with their plans or guise; they commonly favor black robes and armor.The Sith's history prior to the events of the films is portrayed in the comic book series Tales of the Jedi, published by Dark Horse Comics from 1993 to 1998 and considered part of the non-canonical Legends continuity.[15] The Sith Order began around 6,900 BBY, during a period known as the Hundred Year Darkness. A series of conflicts began between the rebellious Dark Jedi, a faction of the Jedi Order, and the rest of the Order. The Dark Jedi were defeated and cast out, exiled to the unknown regions. These Exiles settled on the planet Korriban, and encountered its native species, the Sith. This species consisted of ape-like humanoids with dark salmon-colored skin, chin tentacles, and long bones jutting from their faces. Their culture was reminiscent of both the ancient Egyptians (a monumental necropolis for deceased Dark Lords) and the Indo-Aryans of India (a rigid caste system). The strongest among the Exiles, Ajunta Pall, became the first to hold the title

Dark Lord of the Sith. His contemporaries, such as Karness Muur and XoXaan, became Sith Lords. The human Dark Jedi interbred with the Sith species, who also had an affinity for the Dark Side. They would become the original Sith Empire.[16]One of the earliest leaders of this Sith Empire was Tulak Hord. He expanded the Sith territories and conquered the Dromund System, home to Dromund Kaas, later the capital of the Sith Empire. He was eventually followed by Marka Ragnos, the last ruler of a period known as the Golden Age of the Sith. Upon the passing of Ragnos, two contenders for the throne of Dark Lord, Naga Sadow and Ludo Kressh, dueled at his funeral. Eventually, after a series of conflicts, Sadow was victorious, and Kressh apparently killed.[17]Sadow began the Great Hyperspace War, invading the Republic and laying siege to its planets. Sadow's efforts were initially met with success, his forces amplified by illusions that Sadow projected from his meditation sphere. Ultimately, however, his concentration was broken when his apprentice turned on him. With his illusions dispersed, Sadow's forces were forced to retreat. Upon returning to Sith space they found that Kressh had not been killed, and they engaged him in a space battle. Sadow was victorious once again, but they were soon attacked by Republic forces. Sadow escaped by causing the Denarii Binary Star to go supernova. The Sith Empire was saved from collapse by Darth Vitiate, another one of Ragnos' former acolytes, who led the Sith into hiding in the Unknown Regions.In the Empire's absence, the influence of the Sith eventually led to the corruption of several Jedi Knights, including Freedon Nadd, Exar Kun, and Ulic Qel-Droma. Nadd, a former prodigy from the Jedi stronghold world of Ossus, made the conscious choice to embrace the dark side of the Force and sought out knowledge from Sadow's fallen empire, eventually leading him to Sadow himself, still alive and in exile on Yavin IV. After learning from Sadow, Nadd killed him and used his Sith status and power to conquer the planet Onderon and produce a royal lineage. After Nadd's death, Exar Kun sought out Sith arts from both Nadd's spirit and that of Marka Ragnos. The latter declared Kun Dark Lord of the Sith and made Qel-Droma his apprentice. Corrupting several Jedi to their cause and allying themselves with warriors such as the Mandalorians, Kun and Qel-Droma declared war on the Galactic Republic. During a raid on the Jedi Library at Ossus, Qel-Droma dueled and killed his brother, but was captured. Qel-Droma was redeemed and was instrumental in Kun's downfall, when the latter retreated to Naga Sadow's former stronghold on Yavin IV.Exar Kun's invasion directly influenced the Mandalorian Wars, whereas the individuals known as Revan and Alek came across Darth Vitiate's empire in the Unknown Regions. Seduced to the dark side and declaring themselves Sith Lords, Revan and Alek became Darth Revan and Darth Malak, respectively. Vitiate had them seek out the Star Forge, an ancient, alien weapons plant that the Sith hoped to use to speed up their return to the galaxy. Revan and Malak instead opted to use the Star Forge to fuel their own imperial war machine and led a brutal and hugely successful campaign against the Republic. Revan was eventually betrayed by Malak, allowing a Jedi strike team to capture him. Malak continued his conquest without Revan's tactical leadership until a redeemed Revan defeated him, and the Star Forge, the source of the Sith fleet, was destroyed.Remnants of Revan's Sith Empire were reorganized into a loose alliance of soldiers, assassins, and fallen Jedi led by the Sith Triumvirate, a triad of Sith Lords consisting of Darth Traya, Revan's former teacher; Darth Nihilus, a fallen Jedi and survivor of the Mandalorian Wars; and Darth Sion, a veteran Sith warrior from Exar Kun's war. The three of them began a shadow war against the Jedi, with Nihilus using his power to absorb Force energies to wipe out an entire planet of Jedi refugees, while Sion led a contingent of assassins to hunt down the survivors. This First Jedi Purge brought the Jedi Order to the brink of extinction. The Triumvirate's downfall came about when Meetra Surik, a Jedi who was exiled after the Mandalorian Wars, returned to known space. She defeated the three Sith, and without the Sith leadership, and the destruction of their base of operations on Malachor V, the remaining Sith forces faded into obscurity. Surik's students were able to help the Jedi recover from the Triumvirate's purge.Around 300 years later, the original Sith Empire, still under the leadership of a seemingly immortal Vitiate, emerged from the Unknown Regions and declared war on the republic. This war, dubbed the Great Galactic War, was halted when Vitiate, on the cusp of victory, was restrained by the telepathic prowess of Revan. After a period of non-fighting, called the Galactic Cold War, tensions boiled over, and the Galactic War began. The war briefly fell in favor of the Republic and the Jedi, with the Sith gradually losing ground, until both factions were forced to join in an alliance against a third faction of Force-users known as the Eternal Empire. Once the Eternal Empire was defeated, the war against the Sith resumed. Vitiate perished during the conflict, with Darth Malgus eventually taking control. Malgus proved to be a fairly successful leader but over time the Sith Empire eventually fell to infighting and mostly disappeared. Occasionally, a Dark Lord such as Darth Rivan or Darth Ruin would rise and fall, but the Sith did not become a major threat again until around 2,500 years later.At this point the Brotherhood of Darkness arose, led by the Sith Lord Skere Kaan. They focused on controlling the infighting between the Sith. This policy allowed them to make great progress in their war against the Republic. Ironically, one of their own, the Sith Lord Darth Bane, turned on them, engineering a civil war that ended with the deaths of every one of the Brotherhood's members, except for Bane himself. Bane then started the Rule of Two, which evolved into the Sith as they are seen in the films - an order consisting only of two Sith Lords, a master and an apprentice.Main article: Star Wars PremiseThe Star Wars saga began with the film Star Wars Episode IV: A New Hope, which was released in 1977.[18] Since then, films, books, computer games and comics have been released, all set in the fictional universe of Star Wars, which has expanded the history of the Sith within their stories.The schemes of the Sith are key to the overarching plot of the Star Wars films and much other fictional material in the franchise. Their background has varied among depictions, but the Sith have always been insidious archenemies of the Jedi leveraging dark arts in pursuit of power and revenge. The Sith were first mentioned in A New Hope in a scene ultimately cut from the film. They were expanded upon heavily in the following years in books, comics, games and other multimedia. The Sith were formally introduced on-screen with the release of Star Wars: Episode I The Phantom Menace in 1999 as a shadowy martial order manipulating the movie's political factions into a galaxy-spanning civil war.Star Wars: The Clone Wars first aired on Cartoon Network in 2008. This series took place between Episode II: Attack of the Clones and Episode III: Revenge of the Sith. During this time, Anakin Skywalker is a full-fledged Jedi Knight and the series shows how he progresses into his fall to the Dark Side of the Force.[19] Count Dooku is the active Sith Lord and leader of the Separatist Alliance. The series also explores Dooku's attempts at training secret apprentices like Asajj Ventress and Savage Opress in order to eventually defeat Darth Sidious and become the ruling Sith Lord.The origin, agenda, abilities, and philosophy of the Sith are intertwined with their relationship to the Force. With proper training, the Force may be called upon by rare individuals capable of "sensing" or "touching" it to achieve extraordinary feats such as telekinesis, precognition, and mental suggestion. Not all psychological states are conducive to employing the Force; discipline is required. However, both quietude and focused, intense passion alike can be effective. The Sith originated in a species of Force-sensitive warriors who discovered the efficacy of passion as a tool to draw on the Force at least 5,000 years prior to the events of the first Star Wars film.[20][21] Fully embracing this approach, they became defined and corrupted by it.The warriors who would become the first Sith were apparently heterodox members of the Jedi. The Jedi served as a space-faring knightly order within the Galactic Republic, a representative democracy encompassing most developed worlds. The Jedi Order sought to use the powers of the Force to help defend the weak and advance the rule of law across the galaxy, in keeping with their ethics of self-sacrifice and service to the common welfare. The Jedi creed mirrored their method of utilizing the Force, and Jedi doctrine favored states of serenity, detachment, compassion, and humility as the proper means of accessing its power. Controversy emerged when members of the Jedi Order began to experiment with passion as an alternative. The Jedi establishment saw these innovations as a threat to the ethos of the Jedi, opening members to the seduction of power and cruelty. Eventually, this controversy led to a conflict in which the rebelling Jedi were defeated and exiled.[22]In exile, the dissident Jedi were free to explore the relationship between passion and the Force. They concluded that the martial and ethical disciplines of the Jedi establishment were foolish and misguided. Passion, not quietude, was the most potent means of accessing the Force, and conflict, not peace, was the natural and healthy state of the universe. Rejecting the teachings of the Light side of the force, the exiles now embraced ruthless personal ambition, believing that power belonged to those with the cunning and strength to seize it. In their training, the dissidents would seek to master the Force by cultivating dark passions such as anger and hate, a practice condemned by the Jedi. Guided by their egoistic philosophy based on ruling by seizing power, and armed with taboo Dark Side techniques, the former Jedi exiles reemerged to menace the galaxy as the Sith Order, aiming to conquer the Galactic Republic and exact revenge against the Jedi.[citation needed]A succession of Sith-led regimes would arise to challenge the Jedi and the Galactic Republic, an era known as The Great Hyperspace Wars.[23] The Jedi-led Republic Armed Forces managed to repel the Sith Invasion from Coruscant and then pursued them all the way back to Korriban and essentially killed and purged all of the Sith they could find; Republic historians would call this campaign the post-great hyperspace War counter Invasion but the Sith simply called it a holocaust. However, internal power struggles would prove decisive in thwarting the Sith's designs. The paradox of reconciling endless personal ambition with the interests of the Sith as a whole became a great practical and philosophical concern for the Sith.Ultimately, this paradox was resolved through a drastic reorganization by Darth Bane, who recast the Sith into a master-apprentice tradition called the Rule of Two.[24] Starting with Darth Bane, there would be only two Sith at a time: one to embody power, and the other to crave it. While concealing their identity as Sith, a succession of Sith masters and apprentices would work through the centuries to place themselves into positions of power and undermine the responsible authorities, preparing to overtake the Galactic Republic. The Banite tradition encouraged each apprentice to eventually challenge and murder his or her master, and take an apprentice in turn. In this way, Darth Bane guaranteed the conspiracy remained a secret for a thousand years. He believed the Sith could exert their power and obtain their revenge against the Jedi by galactic domination. The first six Star Wars films chronicle this ancient scheme.Darth Bane's plan would come to fruition through Senator Palpatine, of Naboo, later Supreme Chancellor, of the Galactic Republic, and secretly a Dark Lord of the Sith (Darth Sidious). By manipulating disgruntled factions within the Galactic Republic, Palpatine orchestrated civil war. This conflict, known within the Star Wars universe as the "Clone Wars", provided a justification for consolidating power in the Galactic Republic's chief executive and assembling a large army of cloned soldiers conditioned to obey certain key commands issued by Palpatine. The Jedi eventually discovered Palpatine's identity as a Sith Lord and attempted to arrest him. Palpatine framed their actions as an attempted coup, using it as a pretext for annihilating the Jedi by activating Order 66, one of the embedded protocols in the clone soldiers. In the course of effecting his designs, Palpatine also manipulated the most powerful Jedi Knight, Anakin Skywalker, into his service by promising to teach him how to save the life of Padm Amidala. In a tragic irony, Padm's sheer horror at discovering Anakin's collaboration with Sidious resulted in her death during childbirth. Sidious would trick Anakin into believing that he had killed Padm in anger. Anakin's subsequent emotional collapse would lead him to fully embrace the dark side of the Force. Sidious would rule the newly created Galactic Empire for approximately 20 years as its Emperor with Darth Vader at his side. Initially unknown to Vader and Sidious, two children were delivered by Padme before her death.The Rebels episode "Twilight of the Apprentice" features a forbidden planet called Malachor,[25] home of an ancient Sith temple.[26] The temple contains a superweapon, and can only be activated by placing a special Sith Holocron[27] in an obelisk at the summit of the pyramid inside the temple. Thousands of years prior, a battle was waged on Malachor that resulted in the deaths of its inhabitants. Somewhere between the events of his last appearance in Solo: A Star Wars Story and this Rebels episode, Darth Maul had become stranded on the planet. When Ahsoka Tano, Kanan Jarrus and Ezra Bridger arrive, Ezra is separated from them. He is discovered by Maul, and together, they use the Force cooperatively to solve a series of tests, and retrieve a Sith Holocron. With the help of Kanan and Ahsoka, they fought three Inquisitors, all of whom are killed by Maul. Maul then betrays his allies, blinding Kanan, and proceeds to activate the superweapon.Maul is defeated by a sightless Kanan, and Darth Vader arrives with the intention of retrieving the holocron, but is challenged by Ahsoka, his former Padawan. While the superweapon is preparing to fire, Kanan and Ezra retrieve the holocron and escape, preventing the weapon of mass destruction from being used. Even though the temple is destabilized, Ahsoka and Vader keep fighting to the death within the rapidly crumbling building, until it eventually explodes, wounding Vader.[28]The Star Wars Resistance episode "The Relic Raiders" depicts a Sith temple hidden underneath a later Jedi temple.[29]Anakin's children, Leia, and Luke Skywalker would become key members of the Rebel Alliance to restore the Galactic Republic. Luke would be secretly tutored in the ways of the Force by Vader's own former Jedi Master, Obi-Wan Kenobi, and a powerful elder Jedi, Yoda, who also survived Darth Sidious' purge. Ironically, during a final confrontation between Luke Skywalker, Darth Vader and the Emperor aboard a mobile battle station known as the Death Star, the Sith lineage would end as Darth Bane prescribed that it proceed.Sidious offered Skywalker an ultimatum to enter his service or die, and proceeded to use his Force-derived powers to torture and threaten to kill Skywalker when the latter refused to embrace the dark side of the Force. Experiencing a crisis of conscience at the imminent death of Skywalker, whom Vader now knew to be his son, Vader chose to intervene and kill his former master, Sidious, fulfilling the prophecy of the Chosen One. Vader would die of his own injuries shortly thereafter, thus apparently bringing an end to the Sith and their ancient vendetta.The 2019 film The Rise of Skywalker depicts the climax of the conflict between the Sith and the Jedi,[30] and features the group known as the Sith Eternal, led by a resurrected Darth Sidious. When Sidious meets his second and permanent demise at the hands of his granddaughter Rey.Before the films - At an unknown point in time, numerous Jedi become disillusioned with the Order and exile themselves, forming the Sith Order. Thousands of years later, a centuries-long war between the Jedi and the Sith takes place, which culminates with the apparent death of all the Sith. The sole survivor, Darth Bane, takes an apprentice and goes on to create the Rule of Two, beginning the era of the modern Sith, who live in secrecy. Almost 1,000 years after Bane's death, Darth Plagueis trains Darth Sidious, who ultimately kills his master and takes Darth Maul as his first apprentice.Star Wars: Episode I The Phantom Menace - Sidious and Maul are the only known Sith in the galaxy. The latter kills Jedi Master Qui-Gon Jinn but is defeated by his padawan Obi-Wan Kenobi and is presumed dead.Star Wars: Episode II Attack of the Clones - Sidious has replaced Maul with Darth Tyranus who had formerly been a Jedi Master and was once the mentor of Obi-Wans late master Qui-Gon Jinn.Star Wars: The Clone Wars film and television series - Sidious and Tyranus are the main pair of Sith in the galaxy. Tyranus takes Asajj Ventress as an informal apprentice, and later replaces her with Savage Opress. After betraying Tyranus, Opress finds his lost brother, Maul, who resurfaces as a Sith Master to rival Sidious and takes Opress as an apprentice. Sidious later kills Opress, and Tyranus kills Ventress who ends up dying and being buried on Darthomir but returning later in Star Wars: The Bad Batch due to night sister magic.Star Wars: Episode III Revenge of the Sith - Tyranus is killed by Jedi Knight Anakin Skywalker, who later turns to the dark side and becomes Sidious' third apprentice, Darth Vader. The Sith effectively take over the galaxy by nearly exterminating the entire Jedi Order and converting the Republic into the Galactic Empire, which Sidious rules as Emperor.Star Wars Rebels - Sidious and Vader are the main pair of Sith in the galaxy. Vader trains the Inquisitors, most of whom are former Jedi, to hunt down surviving members of the Order hiding from the Empire. Maul lives in exile and no longer sees himself as a Sith; he later tries to take Ezra Bridger as an apprentice, but fails, and is eventually killed in a duel against Obi-Wan.Star Wars: Episode IV A New Hope, Star Wars: Episode V The Empire Strikes Back, and Star Wars: Episode VI Return of the Jedi - Sidious and Vader are the only Sith in the galaxy. Vader eventually kills Sidious to save his son, Luke Skywalker, redeeming himself and returning to the light side at the cost of his own life. The deaths of Sidious and Vader signify the end of the Sith for the following three decades, and the beginning of the downfall of the Galactic Empire, which eventually collapses one year later.Star Wars: Episode VII The Force Awakens - Snoke and his apprentice, Kylo Ren, Vader's grandson fill in the power vacuum left by the absence of the Sith in the galaxy. Snoke serves as Supreme Leader of the First Order, which emerged from the remnants of the Galactic Empire, while Kylo leads the Knights of Ren, a group of Force-wielders who take their strength from the dark side. None of them are official Sith.Star Wars: Episode VIII The Last Jedi - Snoke is killed by Kylo Ren, who replaces him as Supreme Leader.Star Wars: Episode IX The Rise of Skywalker - Sidious is revealed to have been resurrected and to have manipulated Kylo Ren's actions. He leads the Sith Eternal on Exegol and attempts to reconquer the galaxy for the Sith, but is ultimately and permanently killed by his granddaughter Rey, the last living Jedi, but she dies as a result. Kylo is redeemed like Vader before him by reclaiming his identity as Ben Solo and kills the Knights of Ren before Sidious' second and permanent death happened. Ben later gave his own life to revive Rey. Without its leadership, the First Order eventually collapses, marking the permanent end of the Sith.Jedi and Sith Order master-apprentice relationshipsGenerations of SithDarth AndedduImmortal God-King of Prakith[n 1][n 2]Darth VitiateTenebrae Valkorion[n 3]Darth TrayaKreia[n 3]Exal Kressh[n 3]Revan[n 3]The Jedi ExileMeetra Surik[n 3]Darth Malak[n 3]1,000 GenerationsDarth BaneDessel[n 1]Darth ZannahRain[n 1]Darth CognusThe Huntress[n 1]Set Harth[n 1]Darth Millennial[n 1]1,000 YearsProphets of the Dark SideDarth TenebrousRugess Nome[n 2]1,000 YearsDarth PlagueisHego DamaskDarth VenamisRen[n 4]Darth SidiousEmperor PalpatineSith Eternal[n 2]Supreme LeaderSnoke[n 2]Mother Talzin[n 5]Darth TyranusCount DookuCylo Directive[n 6]Kylo RenBen Solo[n 2]Maul[n 5]Asajj Ventress[n 5]General GrievousDarth Momin[n 6]Knights of RenQuinlan Vos[n 7]General Krell[n 5]Darth VaderAnakin SkywalkerEzra BridgerSavage Opress[n 5]Doctor Chelli Lona Aphra[n 6]InquisitoriusStarkillerGalen Marek[n 8]The Dark Apprentice[n 8]Colour key:ColourDescriptionJediSithKnights of RenJedi turned SithFormer SithSith apprenticesOther Force usersCannot use the ForceNotes:^ a b c d e f Established in the Darth Bane trilogy (20062009), written by Drew Karpyshyn.^ a b c d e Established in the 2019 film Star Wars: The Rise of Skywalker, written by Chris Terrio and J. Originally the eldest son of an aristocratic family from the planet Naboo, he rose to power within the Galactic Republic's government system starting from Senator of his homeworld, then to Supreme Chancellor of the Republic, and finally to self-proclaimed Emperor of the Galactic Empire. This was done by cultivating a public image as a humble and competent politician while secretly mastering dark Sith arts studying under Plagueis, and planning the destruction of the Jedi Order and Republic. Eventually, by manipulating disaffected political groups and using double agents to sow discord, Palpatine fomented a civil war that provided an opportunity for him to seize absolute power. He had three known Sith apprentices: Darth Maul, Darth Tyranus, and Darth Vader. He was eventually betrayed and killed by his last, Vader, at the end of Return of the Jedi.[31] He returned more than 30 years later in The Rise of Skywalker, having managed to cheat death through powerful mastery of the dark side of the Force.[32] He attempted to reclaim control of the galaxy through the Sith Eternal's fleet of Xyston-class Star Destroyers, the Final Order, but was finally killed by his granddaughter, Rey, who deflected his Force lightning back at him using the two Skywalker lightsabers. Darth Sidious' second and permanent death marked the definitive end of the Sith.In Legends continuity, Darth Sidious would return using clones and ancient Sith powers, returning in several clone bodies over the course of several novels and comics. During this time he would briefly turn Luke Skywalker to the dark side of the Force through sheer power as much as by guile, though Luke would later be redeemed by his sister Leia and restored to the light side of the Force and defeat Palpatine once and for all. Shortly before his first death, Palpatine had sent a psychic command through the Force to Mara Jade, planting in her the need to kill Luke. She eventually fulfilled this command by slaying a clone of Luke called Luuke Skywalker, whom Palpatine had made in an attempt to use him against the original, though this plot ultimately would fail due to Mara's fatal attack on the clone.Main article: Darth MaulDarth Maul was a Dathomirian Zabrak Sith Lord who served as the first apprentice of Darth Sidious. He first appeared in Star Wars: Episode I The Phantom Menace, where he was ordered by his master to capture Queen Amidala of Naboo in order for her to sign a treaty that would legalize the Trade Federation's invasion of the planet. During a duel with Jedi Master Qui-Gon Jinn and his Padawan apprentice Obi-Wan Kenobi, who were assigned to protect Amidala, Maul killed the former, but was sliced in half by Obi-Wan and fell down a shaft. Although presumed dead, he survived his injuries and ended up on the junk planet Lotho Minor, where he would become a cyborg and be driven to insanity. He was eventually rescued by his brother Savage Opress twelve years later, during the Clone Wars.After being provided with a pair of new robotic legs by the Nightsisters, led by Maul's mother, Talzin, he sought revenge against Obi-Wan. This culminated with Maul allying with various crime syndicates, taking over the planet Mandalore, and killing Duchess Satine Kryze, whom Obi-Wan loved. Although he was then captured by his former master, Sidious, who came to see him as a rival, he managed to escape and rebuild his criminal empire. Following his overthrow and capture by the Galactic Republic, Maul escaped once again and went into hiding while no longer being a Sith Lord. During the reign of the Galactic Empire, Maul resurfaced as a crime lord and ran his syndicate, the Crimson Dawn, from the shadows, but is eventually stranded on the Sith world of Malachor. He escaped years later, after meeting Ezra Bridger, whom he then forced to assist in locating Obi-Wan. Finding him to be hiding on Tatooine, Maul fought his old nemesis one last time and was mortally wounded. Before dying, Maul took comfort in the fact that Obi-Wan was looking after who he believed to be the "Chosen One", who would one day avenge them by destroying the Sith.Main article: Count DookuDarth Tyranus (Count Dooku) was a human Dark Lord of the Sith and the second apprentice of Darth Sidious, first appearing in Star Wars: Episode II Attack of the Clones. Born to the royal family of the planet Serenno, Dooku was rejected by his family as an infant upon the discovery of his connection to the Force, which his father in particular feared and, as such, abandoned him after contacting the Jedi Order to come and take him to Coruscant. During his training under Yoda, Dooku proved himself to be both strong with the Force and a skilled duelist, regarded by many as one of the best in the Order. Upon becoming a Jedi Master, he left the Order and returned to Serenno to reclaim his title and heritage as a nobleman. He later fell to the dark side and became a Sith Lord and Darth Sidious' puppet.Dooku helped Sidious with his galactic conquest plans, recruiting the bounty hunter Jango Fett as the template of the clone army that would be used by the Galactic Republic, and forming the Confederacy of Independent Systems from various planets and systems that wanted to become independent from the Republic, resulting in the Clone Wars. Dooku served as the figurehead of the Separatist Alliance throughout the Clone Wars, until meeting his demise at the hands of Anakin Skywalker in Star Wars: Episode III Revenge of the Sith. In his final moments, Dooku realized that Sidious had merely used him to aid his schemes, and had planned to have him killed and replaced by someone more powerful all along.[33]Main article: Darth VaderDarth Vader (Anakin Skywalker) was a human-cyborg Dark Lord of the Sith and the third and final apprentice of Darth Sidious, who first appeared in the Star Wars original trilogy, and later in the prequel trilogy. As the Jedi hero Anakin Skywalker, he fought alongside his master Obi-Wan Kenobi during the galaxy-wide Clone Wars, but was slowly seduced to the dark side by Darth Sidious, then Chancellor Palpatine, before his ascension to Emperor. After helping Sidious kill Jedi Master Mace Windu, he swore allegiance to the Sith and was given the name Darth Vader before setting out to destroy all Jedi left on Coruscant. After being sent by Sidious to assassinate the Separatist council members on Mustafar, Vader was badly injured in a duel with Kenobi, resulting in the loss of his remaining organic arm, both legs, and severe burn injuries. He was saved by Sidious, and encased in a black suit of armor with extensive cybernetics which kept him alive.As the Galactic Empire was established and continued to grow, Vader became the Emperor's immensely feared second-in-command and was given the task of finding surviving Jedi and the Rebel Alliance's base. After the destruction of the first Death Star, Vader was charged with tracking down the Rebel Alliance and destroying their headquarters. However, the actions of his son, Luke Skywalker, eventually turned Vader against his master, resulting in both Sidious' and Vader's deaths, as well as the fulfilment of the Chosen One prophecy.[34]Main article: Darth PlagueisDarth Plagueis was a Muun Dark Lord of the Sith and Darth Sidious' master, first referenced in Star Wars: Episode III - Revenge of the Sith. In the film, Sidious (as Palpatine) uses Plagueis' story to seduce Anakin Skywalker to the dark side, claiming that Plagueis' abilities in the Force grew to such an extent that he could create life by influencing microscopic Force-sensitive entities called "midi-chlorians," and even save people from dying. According to the Rule of Two, Plagueis was eventually killed by Sidious in his sleep, who subsequently became the new Sith Master and would later take on an apprentice of his own. [citation needed]Plagueis is the main character of the Legends novel, Star Wars: Darth Plagueis, which explains much of his backstory, including his training under Darth Tenebrous, mentorship of Palpatine, and early plans to undermine the Galactic Republic and drive the Jedi Order into ruins. The novel also reveals that Plagueis' public identity was Hego Damsk II, a member of the Intergalactic Banking Clan.Main article: Darth BaneDarth Bane (Dessel) was a human Dark Lord of the Sith and the sole survivor of the Sith Order in the aftermath of the ancient war between the Jedi and the Sith. He is best known for establishing the Rule of Two, which was considered the beginning of the modern Sith within the Star Wars canon. This law stated that there must be only two Sith Lords at a time: a master to embody power, and an apprentice to crave it and eventually overthrow his/her master and adopt an apprentice of his/her own.[2] He is the main character of the Darth Bane Trilogy by Drew Karpyshyn, which part of the Legends continuity.In the Star Wars canon, Darth Bane's backstory as the only Sith survivor of the Jedi-Sith war and the creator of the Rule of Two is mostly unchanged, though not much else is known about him. His only canonical appearance was in the episode "Sacrifice" of Star Wars: The Clone Wars, where his spirit was encountered by Yoda on the Sith homeworld of Moraband. It is revealed by the novelization of The Rise of Skywalker and Darth Sidious in his book, titled The Secrets of the Sith that the Rule of Two was a pale imitation, an unworthy but necessary successor to the Doctrine of the Dyad,[35][36] which was a concept centered on two Force-sensitive beings who had an unbreakable Force-bondwhich made them one in the Forcecollectively known as a Force dyad.Darth Momin was a humanoid Dark Lord of Sith who appeared in the comic book Darth Vader: Dark Lord of the Sith and briefly in Lando. Once a sculptor, he was imprisoned at a young age for his creations, which scared most people who saw them. Momin was eventually rescued by a Sith Lady named Shaa, who trained him in the dark side of the Force until he became more powerful than her and killed her. Momin then built a superweapon named Fermata Cage to destroy a city and perished when the Jedi intervened to stop him, losing control over the energy he wielded and causing his physical body to be destroyed, leaving behind only his mask with his spirit inside.Many years later, the mask was retrieved from the Jedi Archive vault by Darth Sidious, who gave it to Darth Vader as a gift for his journey to Mustafar, which Vader sought to make his personal stronghold. After Momin's spirit killed some of his personnel, Vader examined the mask and learned of Momin's past, before letting him possess the body of a Mustafarian and build a fortress for him. Shortly after Momin finished building of the fortress, Vader was distracted by an invasion of Mustafarians, which Momin took advantage of to open the door to the Dark Side and resurrect himself.However, after challenging Vader to a duel, Momin met a quick demise by being crushed with a giant rock. Despite Momin's death, his dark essence remained in the mask for several more years. At one point, Momin's mask was aboard the Imperial yacht Imperialis, when a group of thieves led by Lando Calrissian attempt to rob the ship. After Momin's spirit possessed the bodies of two thieves, the others were forced to abandon them and blow up the ship, seemingly destroying Momin's mask, and his spirit with it. Luke Skywalker later learned about Momin and his history during his travels across the galaxy, and described the Sith Lord's role in building Vader's fortress in his book, titled The Secrets of the Jedi.Exim Panshard A Sith Lord who held the title of Viceroy on a long forgotten planet appeared vocally in the 2022 novel Shadow of the Sith. Exim wore a mask made of a meteoric metal which was strong in the dark of the Force. The mask contained the screams of a hundred innocent individuals slaughtered for the viceroy's pleasure and to give him power, enabling his own spirit to cling onto life through the mask. Yupe Tashu had later obtained the mask. After conferring with the spirits of fallen Sith, he gifted the mask to the Pantoran member of the Acolytes of the Beyond named Kiza. When her boyfriend Remi demanded the mask for himself, Yupe chastised him for angering the fallen specters. He also confiscated Remi's lightsaber and gave it to Kiza. Under the influence of Exim's mask, Kiza took part in an attack on a New Republic outpost on Devaron and killed Remi when he tried to reclaim his lightsaber. Exim's spirit made Kiza into his pawn on the promise she would get power if she brought him to the Sith planet Exegol, where he hoped he would be reborn to bring about a new era of Sith rule. However, Exim's plans were ruined after Jedi Master Luke Skywalker sensed his growing darkness. The quest for Exegol ended in defeat for Exim; after Kiza was killed and he took full control of her body, Luke destroyed his mask before it could claim him as its vessel, ending the threat of Exim once and for all.[37]Darth Atrius Ancient Dark Lord of the Sith who lived before Darth Bane and the modern Sith. He owned two crossguard lightsabers, which were found and given away by the smuggler Sana Starros after the Battle of Yavin. The anger possessed by Atrius when wielding both these crossguard lightsabers at the same time, carried over to the weapons themselves, and can transfer over to their new owners. These lightsabers were eventually destroyed by Darth Vader and Luke Skywalker, thus possibly erasing all knowledge about Atrius himself.[38]Darth Caldoth Duros Dark Lord of the Sith mentioned in the 2019 novel Myths & Fables. He lived at an unknown point in time before Star Wars: Episode I The Phantom Menace and wrote a book titled The Bestiary of Darth Caldoth, which mentioned various Sith warbeasts. According to the legend, Caldoth eventually gained a Sith apprentice, the Twi'lek Ry Nymbis, and they were considered the two most powerful individuals in the galaxy at the time. Caldoth killed his own apprentice with a Sith ritual that turned the person's body into stone when he felt Nymbis was going to betray him. With the ritual, Nymbis was trapped in an eternal nightmare.Darth Krall Dark Lord of the Sith born as Radaki, who lived at an unknown point in time before Star Wars: Episode I The Phantom Menace. He was first mentioned in the 2019 audiobook Dooku: Jedi Lost. Krall was seduced to the dark side after losing his faith in the Jedi Order, believing that the Jedi should retain their family ties and wealth. During his life, he fought in the Battle of Wasted Years, where the Sith emerged victorious, and tamed the Nightmare Conjunction. His lightsaber would later be stored in the Bogan Collection at the Jedi Temple on Coruscant.Darth Skrye Dark Lady of the Sith mentioned in the audiobook Dooku: Lost Jedi. She lived at an unknown point in time before Star Wars: Episode I The Phantom Menace. Her voice was heard by Count Dooku during his time as a Jedi Padawan, in a Force vision that he had after encountering the Presagers of Hakotei on Asusto. In this vision, Skrye claimed that the Sith were reborn and activated a superweapon called the Cauldron, which destroyed a planet. She also owned an artifact called the Hand of Skrye, which would eventually be found by the Jedi Lene Kostana and Sifo-Dyas on Rishi.Darth Wrend Dark Lord of the Sith mentioned in the novel Master & Apprentice. He lived at an unknown point in time before Star Wars: Episode I The Phantom Menace, and was best known for coming back to life after being killed by the Jedi Order, in order to fight them once again. The legend of Darth Wrend would come to Qui-Gon Jinn's mind during his time as a Padawan, who opened the holocron of prophecy, which contained numerous prophecies, many of which dated from ten thousand years ago. One of the prophecies said that evil would disappear yet appear again once the righteous had lost its light, which many believed that was referring to the return of the Sith. At that time, Qui-Gon believed that the prophecy talked about Darth Wrend's return from the dead and that it had already been fulfilled; it would later be revealed that the prophecy was actually about the return of the Sith after living in secrecy for almost a millennium.Darth Tanis Ancient Dark Lord of the Sith who lived at least 4000 years before Star Wars: Episode IV A New Hope, as Sith accounts from the year 3966 BBY describe kyber weaponry developed by him on the planet Malachor. Darth Tanis is only mentioned in The Rise of Skywalker: The Visual Dictionary, where it is revealed that Darth Sidious' Sith Eternal cult named the 17th Legion of Sith Troopers after him.Darth Revan Ancient Dark Lord of the Sith mentioned in The Rise of Skywalker: The Visual Dictionary, as the namesake of the 3rd Legion of Sith Troopers from Darth Sidious' Sith Eternal cult. Darth Revan is a more important figure in the Legends continuity, where he is main protagonist of the video game Star Wars: Knights of the Old Republic, and a major character in related works. Once a Jedi hero of the Old Republic who led the Jedi to victory in the Mandalorian Wars, Revan later searched for the secret Sith Empire and was captured and tortured by the Sith Emperor, turning him to the dark side. After breaking free of the Emperor's control, Revan and his friend and Sith apprentice, Darth Malak, created their own Sith Empire using the ancient Star Forge to wage war on the Republic, but Malak eventually betrayed Revan and ordered his soldiers to fire on his ship during a battle against the Jedi. The wounded but still alive Revan was then captured by the Jedi, who erased his memories and gave him a new identity so that he could fight on their side once again. In the end, Revan defeated Malak and his Sith Empire and was seen as a Jedi hero once again, but was later captured by the Sith Emperor again and his psychic broke into a lighter half and a darker half. After being rescued by his descendant Satele Shan 300 years later, Revan's darker half sought to resurrect the Emperor's physical form so that he could kill him for good, but was defeated by the combined efforts of the Jedi, Sith, and his lighter half. The two halves of Revan then merged in peace and died for the final time.Darth Andeddu Ancient Dark Lord of the Sith mentioned in The Rise of Skywalker: The Visual Dictionary, as the namesake of the 5th Legion of Sith Troopers from Darth Sidious' Sith Eternal cult. Darth Andeddu is a more important figure in the Legends continuity, where he is one of the first known Sith Lords to have lived, as he preceded the creation of the "Darth" title. After being forced to flee from Korriban, Andeddu created the world of Prakith, which he ruled as a deity for several centuries, before tombing himself to prevent his followers from stealing his secrets after his death. During his life, he created the first ever Sith holocron to store his knowledge, and discovered the ability to cheat death by transferring one's essence into another vessel.Darth Tenebrous Dark Lord of the Sith mentioned in The Rise of Skywalker: The Visual Dictionary, as the namesake of the 26th Legion of Sith Troopers from Darth Sidious' Sith Eternal cult. Darth Tenebrous is a more important figure in the Legends continuity, where he was Darth Plagueis' master and possessed an unusual ability to foresee the future, including his own death. He maintained a public persona as Rugess Tome, a legendary artisanal starship designer, and was forced to wear a breathing apparatus. Tenebrous hoped to possess the Chosen One once they would be revealed and gain immortality, but he was eventually betrayed and killed by Plagueis. Although Tenebrous managed to cheat death by entering his apprentice's body, he couldn't do anything when Plagueis was killed by his own apprentice, Darth Sidious. Unable to return to his original body or possess another person, Tenebrous was cursed to remain a vague spirit for the rest of eternity.Darth Phobos Ancient Dark Lady of the Sith mentioned in The Rise of Skywalker: The Visual Dictionary, as the namesake of the 39th Legion of Sith Troopers from Darth Sidious' Sith Eternal cult. Darth Phobos also exists in the Legends continuity, where she was a seductive Theelin Sith with mind manipulation abilities. She killed many of her fellow Sith in a bid of power and formed a cult to worship her, but was ultimately killed by the combined forces of the Jedi and Sith. Her image was later incorporated in the training simulations at the Jedi Temple on Coruscant. This virtual representation of Phobos was fought by Starkiller in Star Wars: The Force Unleashed.Darth Desolous Ancient Dark Lord of the Sith mentioned in The Rise of Skywalker: The Visual Dictionary, as the namesake of the 44th Legion of Sith Troopers from Darth Sidious' Sith Eternal cult. Darth Desolous also exists in the Legends continuity, where he was a Pau'an warrior expelled from the Jedi Order due to his violent nature. He trained an army of fellow Pau'ans to fight them, but ended up falling into a trap set by the Jedi and perished in battle. His image was later incorporated in the training simulations at the Jedi Temple on Coruscant. This virtual representation of Desolous was fought by Starkiller in Star Wars: The Force Unleashed."Qimir"/The Stranger A High Republic-era Sith appearing in The Acolyte, portrayed by Manny Jacinto; the first apprentice of Darth Plagueis and the master of Mae-ho "Mae" Aniseya, he takes her on as an acolyte and has her enact her revenge upon the Jedi she deems responsible for the deaths. While posing as her own helper while hiding his face from her mind, Qimir attempts to execute Mae after she elects to betray him, slaughtering the squad of Jedi who had searched for her across the galaxy, before looking after Mae's unconscious twin Osha.[39][40]Main articles: Star Wars canon and Star Wars expanded universeFollowing the 2012 acquisition of Lucasfilm by The Walt Disney Company, Lucasfilm rebranded most of the licensed Star Wars novels, comics, and other fictional media published since the original 1977 film (previously identified as the Star Wars Expanded Universe) as Star Wars Legends and declared them non-canonical to the franchise in April 2014.[41][42][43]The Sith feature heavily in many stories of the Star Wars Expanded Universe (EU), appearing in a variety of media created prior to the advent of the 2015 feature film Star Wars: The Force Awakens.[44] Future authors and screenwriters are not required to honor all of the events depicted in this material, but the Expanded Universe has remained a source of creative inspiration. The EU thoroughly details the schism between the dissident Dark Jedi and the Jedi establishment that led to the creation of the Sith Order, as well a series of conflicts between the Sith, Jedi and the Galactic Republic spanning the millennia prior to the events of the Star Wars motion picture series, and certain events thereafter.In the EU, the Sith trace their origins to the followers of a dissident Jedi named Ajunta Pall, who endorsed the use of the Dark Side of the Force, contrary to Jedi orthodoxy.[45] After Pall and his Dark Jedi followers were exiled for their practices, they eventually settled on a planet named Korriban, which was occupied by the "Sith," a red-skinned humanoid race with a high prevalence of Force-sensitives. Over the course of centuries of intermingling between the ethnic Sith and Dark Jedi, the name "Sith" would come to apply to the martial philosophy and political affiliation created by the former Jedi exiles on Korriban, rather than a specific race. This Sith regime would strike out at the Galactic Republic and Jedi on numerous occasions.Notable conflicts between the Sith and the Galactic Republic include the "Great Hyperspace War," in which the Sith would launch a massive invasion of the Republic but succumb to infighting, and the Sith Holocaust, in which the Galactic Republic failed in its attempt to exterminate the Sith from known space. This resulted in the Sith survivors taking a vow of eternal vengeance on the Galactic Republic. The EU also describes the exploits of Sith characters following the collapse of Emperor Palpatine's Galactic Empire and the restoration of the Republic, such as the attempt by Darth Krayt to establish a New Sith Order on Korriban.The first Expanded Universe novel was Splinter of the Mind's Eye, written by Alan Dean Foster and published in 1978. The setting for the novel takes place between Episode IV: A New Hope and Episode V: The Empire Strikes Back. It provides a new adventure that includes Princess Leia, R2-D2, C-3PO, Luke Skywalker and Darth Vader. In the story, Darth Vader tries to get the kyber crystal to use it for his evil schemes.Other novels that depict Sith characters are Darth Maul: Saboteur and Cloak of Deception by James Luceno.[46] Cloak of Deception describes the political background surrounding the Republic in the time period before The Phantom Menace, as well as Darth Sidious' plans to rule the galaxy, starting with the blockade of Naboo.In Darth Maul: Saboteur, the Sith Lord Darth Sidious sends Darth Maul to destroy InterGalactic Ore and Lommite Limited.[47]In Darth Maul: Shadow Hunter, by Michael Reaves, Darth Sidious sends his apprentice, Darth Maul, to investigate the traitor who leaked the secret of his plan to take down the Republic.[48] Shadow Hunter provided insight into the Sith while detailing how Darth Sidious brought his plan of usurpation into action.Dark Horse Comics purchased the copyrights to several Star Wars stories.[49] With their publication of Star Wars: Dark Empire #1 in 1991, they initiated what has become a large line of Star Wars manga and comics.[50] The Sith appear as major antagonists throughout this story's plot.[50] Many of the comics that were published helped expand the backstory of the characters and followed the rise and fall of the Dark Lords of the Sith.[50]Star Wars video games have also been adapted from the plots of the films, novels, and TV shows. The games follow the basic plot of the story, but they can also include alternative, non-canonical, endings depending on which character is being played. Some of the video games that have a heavy focus on Sith characters and lore are Star Wars: Knights of the Old Republic, released in 2003,[51] Star Wars: Knights of the Old Republic II The Sith Lords, released in 2004[52] and Star Wars: The Force Unleashed, released in 2008.[53]Main article: Jacen SoloDarth Caedus (Jacen Solo) was a Dark Lord of the Sith born as the oldest son of Han Solo and Leia Organa Solo. A Jedi hero of the Yuuzhan Vong War, he eventually fell to the dark side years later and masterminded the Second Galactic Civil War. He was eventually killed by his twin sister Jaina for his actions.Main article: Marka RagnosMarka Ragnos was an ancient Sith-human hybrid, who lived during the time of the first Sith Empire, and seized the title of Dark Lord of the Sith, serving as the ruler of the Empire. After his death, two Sith Lords, Naga Sadow and Ludo Kressh, fought to occupy his throne, only for Ragnos' spirit to appear before them and claim that only the most worthy should succeed him. Ragnos lived on as a Force spirit after his death, trapped within his tomb in the Valley of the Dark Lords on Korriban. A thousand years after the Dark Lord's death, Exar Kun summoned Ragnos from his grave through the use of talismans. Ragnos crowned Exar Kun as the new Dark Lord, with Ulic Qel-Droma as Kun's apprentice, as an attempt to resurrect the lost empire thousands of years prior.Several thousands of years after that, in the video game Star Wars Jedi Knight: Jedi Academy (set during the New Republic era), a cult dedicated to Ragnos, led by the Dark Jedi Tavion Axmis, intended to resurrect the Sith Lord using an old artifact called the Scepter of Ragnos. After absorbing Force energy from numerous locations across the galaxy using the scepter, Tavion and her cult traveled to Korriban and almost succeeded in resurrecting Ragnos, but were stopped by Luke Skywalker's New Jedi Order. Inside Ragnos' tomb, the Jedi Knight Jaden Korr defeated Tavion, before Ragnos' spirit possessed her body, attempting to kill the Jedi himself. However, Jaden was able to defeat Ragnos, whose spirit left Tavion's body and returned to the depths of the Force, swearing revenge against the Jedi.Main article: Darth MalakDarth Malak (Alek) is the main antagonist of Star Wars: Knights of the Old Republic. Once a Jedi Knight and Revan's best friend, he fought him alongside in the Mandalorian Wars. Later, Alek and Revan unwittingly discovered the Sith Empire in the Unknown Regions and were captured by the Sith Emperor, who, using Sith sorcery, turned them to the dark side, but the two broke free from his control and formed their own Sith Empire using the Star Forge to wage war on the Republic, with Revan as the leader and Alek, now Darth Malak, as his Sith Apprentice.At some point, Malak attempted to kill Revan and take over the Sith Empire for himself, but was defeated and had his entire lower jaw cut off, forcing him to don a prosthetic jaw instead. Later, when Revan prepared to battle the Jedi who boarded his flagship, Malak betrayed him, ordering the ships under his command to fire on Revan's flagship's bridge, so that he could take over the Sith Empire for himself. However, Revan survived the ordeal and was taken to the Jedi Council Enclave, where he had his memory wiped, so that he would become a Jedi once again. Eventually, Revan faced off against Malak, who revealed the truth of his identity, but was ultimately killed by him, which also led to the downfall of his Sith Empire.Main article: KreiaDarth Traya (Kreia) is a mentor to the "Jedi Exile" and the hidden main antagonist of Star Wars: Knights of the Old Republic II The Sith Lords.[54][55] She is revealed to have been a Sith Master at the end of the game, and is ultimately killed in battle.Main article: Darth SionDarth Sion, also known as the Lord of Pain, is an antagonist in Star Wars: Knights of the Old Republic II The Sith Lords. Alongside Darth Nihilus, he served as one of Traya's apprentices, until ultimately betraying her and driving her into exile. Sion managed to achieve immortality by calling on his pain, anger and hatred every time he was facing certain death, at the expense of all-consuming agony, which also led to his extremely disfigured appearance. The player's character eventually defeated Sion, and was then given the option to turn him back to the light side. Regardless, upon being shown the price he paid for immortality, Sion finally let go of his hate and allowed himself to die permanently.Main article: Darth NihilusDarth Nihilus, also known as the Lord of Hunger, is an antagonist in Star Wars: Knights of the Old Republic II The Sith Lords. Alongside Darth Sion, he served as one of Traya's apprentices, until ultimately betraying her and driving her into exile. Nihilus imbued his dark soul into his mask and robes and had the power to drain the life force out of any living thing. Following the betrayal of his master, Nihilus used the might of the Sith Armada not to conquer planets, but to contain them so that he could "feed" off the Force energy of each planet's lifeforms, wiping planets of life. However, Nihilus was later drawn out and tricked into launching an attack on Telos, believing it to contain the last Jedi. The Exile confronted Nihilus on his ship, and Nihilus was killed either after his former slave Visas sacrificed herself due to their shared link in the Force, or after his attempt to feast on the Exile's connection to the Force backfired and weakened him. Despite his death, Nihilus' soul would continue to live in his mask and robes for millennia to come, as well as inside his own Sith holocron.Known for much of his 1300-year life as "the Sith Emperor", Lord Vitiate was a sociopathic young Lord in one of the earliest iterations of the Sith Empire. When that empire fell, he led an exodus of survivors to the other side of the galaxy to establish a continuation of it, with himself as Emperor. It was Vitiate who corrupted Revan and Malak, but Revan's redemption and Malak's defeat seemingly derailed his plans. Three hundred years after Revan's disappearance, the Emperor launched a surprise attack on the Republic, setting the stage for the video game Star Wars: The Old Republic.Main article: Darth MalgusDarth Malgus (Veradun) is a major antagonist in Star Wars: The Old Republic. A human Dark Lord of the Sith who trained under Vindican, Malgus served the Sith Empire during the Great Galactic War against the Republic. Following the recapture of Korriban from the Jedi, Malgus killed his master and later led a surprise assault on Alderaan, only to be defeated by his nemesis and former opponent from Korriban, Satele Shan.Malgus was severely injured in the fight against Shan, forcing him to wear a respiratory apparatus for the rest of his life. Sometime later, Malgus was tasked by his superior, Darth Angral, with leading an assault team on the Jedi Temple on Coruscant, which Malgus and his forces destroyed, disgracing the Jedi Order in the eyes of the Republic. Although Malgus believed that the Battle of Coruscant was the first step of destroying the Republic, it only served as leverage in the peace negotiations that took place on Alderaan. While the Alderaanian summit progressed, the Sith settled into an occupation of Coruscant. Malgus was placed in charge of orbital security, but the Sith Lord defied his orders and traveled back to Coruscant's surface to strike against the renegade Jedi Aryn Leneer, who wanted to avenge her master Ven Zallow, killed by Malgus during the attack on the Jedi Temple. Although Leneer ultimately failed, the conflict caused Malgus to become disillusioned with the Empire and to kill his lover Eleena Daru, seeing their relationship as a weakness that prevented him from preserving his own power, which he later used to cleanse the Empire of the politicians whom he blamed for allowing the Republic to survive.During the Cold War years that followed the successful peace negotiations, Malgus led Sith forces into the Unknown Regions, claiming previously-unknown territories for the Empire. Towards the end of the war, following the presumed death of the Sith Emperor and his service on the Dark Council, Malgus formed his own Empire, free of the infighting of the Dark Council. However, the Republic and the Sith Empire forces soon teamed up to fight against Malgus' Empire and managed to track him down to his secret base, where they defeated him. Despite his apparent death, Malgus later resurfaced during the Invasion of Ossus at the start of the Third Galactic War, once again serving as a commander within the Sith Empire. However, following the Battle of Corellia, Malgus went rogue, determined to expunge all physical and mental restraints used to keep him under control. Thousands of years after his death, Malgus was still remembered as one of the most powerful Sith Lords to have ever lived. At one point, Darth Sidious acquired some surviving excerpts of Malgus's journals, which he bounded into his Book of Sith, an anthology of Sith historical writings.Dark Side Force-wielders who use the dark side of the Force, but don't follow the Sith ideology and, therefore, are not considered official Sith. Some can be trained by a Sith master as an informal apprentice or assassin, in which case they are called Sith Shadow Hands.Main article: Asajj VentressAsajj Ventress was a Dathomirian Sith Shadow Hand trained under Darth Tyranus (Count Dooku) and an antagonist of the Star Wars: The Clone Wars. She first appeared in the 2003 microseries Star Wars: Clone Wars, in which Darth Sidious assigned her to kill the then-Padawan Anakin Skywalker. After tracking the young war hero to the planet Muunilinst, Ventress engaged Anakin's Republic fighter forces fighting above the Separatist-occupied world and baited him in a chase to Yavin 4, where a fierce battle from the forest to the Massassi temple took place. Though she initially gained the upper hand in the ensuing lightsaber duel, Anakin called upon his immense connection to the Force to brutally overpower her, causing the Dathomirian to fall over the edge of a cliff. However, survived the landing and continued to serve her master throughout the Clone Wars on several occasions.In Star Wars: The Clone Wars, Ventress was a recurring antagonist during the first seasons, as she assisted Dooku with several schemes, most of which were thwarted by the Jedi. After being replaced with Savage Opress for her failures, Ventress returned to the Nightsisters until General Grievous led a massacre against them, which only she and Mother Talzin survived. From there, she helped Boba Fett's team of bounty hunters on a dangerous mission, which thus marked the start of her own bounty hunting career. Ventress later appeared in the novel Star Wars: Dark Disciple, which was intended for a story arc in the TV series. In the novel, she teamed up with Jedi Quinlan Vos to assassinate Dooku, and, along the way, the two fell in love. However, their attempt to kill Dooku failed, and Dooku captured Vos, turning him to the dark side. Ventress managed to turn Vos back, but died saving him from Dooku. She was buried on Dathomir, amongst her fallen sisters.Main article: Savage OpressSavage Opress was a Dathomirian Zabrak Sith Shadow Hand first trained under Darth Tyranus (Count Dooku) and later under his own brother, Darth Maul, as well as a major antagonist in Star Wars: The Clone Wars. Originally a Nightbrother under Mother Talzin on Dathomir, he was handpicked by Asajj Ventress as part of her scheme to kill Dooku for the attempt on her life. He was eventually altered by the Nightsisters, making him more of a berserker on Ventress' call to the point of killing his brother Feral without remorse. Opress managed to become Tyranus' new Shadow Hand and learned only a little about the ways of the Sith before Ventress had him help her fight their master due to his actions under him getting unwanted attention from the Jedi. However, in the heat of the moment and provoked by both of them, Opress tried to kill both Tyranus and Ventress before escaping back to Dathomir. There, he was instructed by Mother Talzin to find Maul so that he could complete his training to defend himself against the numerous enemies he had made.After finding his long-lost brother as a shell of his former self on a junk planet, Opress managed to stir up Maul's grudge with Obi-Wan Kenobi to aid him in his revenge against the Jedi. From there, the two Zabrak brothers were able to set up a Confederacy against the Republic separate from the Separatists, and soon took over Mandalore. However, Darth Sidious, who considered Maul's sudden rise to power a threat to his rule, arrived on Mandalore and fought Maul and Opress. The latter met a quick demise as he was stabbed by Sidious' two lightsabers and died in his brother's arms moments later.Main article: Quinlan VosQuinlan Vos was a Kiffar Jedi Master during the Clone Wars. Near the end of the war, he partnered with Asajj Ventress (who was working as a bounty hunter at the time) to assassinate Count Dooku. After being captured by Dooku, Vos willingly turned to the dark side and became his apprentice, in hopes he could discover the identity of Dooku's master, Darth Sidious. During his time as an agent for the Confederacy of Independent Systems, he became known as "Admiral Enigma". Vos was eventually turned back to the light side by Ventress, at the cost of her own life. After respectfully burying Ventress on her homeworld, Dathomir, Vos was reinstated into the Jedi Order and continued fighting in the Clone Wars on the Republic's side. He later presumably survived the Great Jedi Purge.This section is about the organization. For the 2023 novel, see Star Wars: Inquisitor.The Inquisitorius, formally known as the Inquisitors, were an organization of Force-sensitive warriors in the service of the Galactic Empire who became defunct at some point before A New Hope. All of them were former Jedi, who had lost their faith in the Jedi Order and succumbed to the dark side, during or shortly after the Clone Wars. They were all trained by the Sith Lord Darth Vader, who tasked them with hunting down other survivors of the Great Jedi Purge, as well as other Force-sensitive individuals, mostly children, to prevent them from becoming future Jedi. The Grand Inquisitor The individual who would become known as the Grand Inquisitor was originally a Pau'an Jedi Temple Guard during the Clone Wars. After losing his faith in the Jedi Order and falling to the dark side, he came into service of the Empire and worked his way up its ranks to become the leader of the Inquisitors. The Grand Inquisitor was introduced as the main antagonist of the first season of Star Wars Rebels, where he was assigned to hunt down Kanan Jarrus and Ezra Bridger. He was eventually defeated by Kanan and chose to commit suicide rather than face the infamous wrath of Darth Vader for his failure. His light side essence later helped Kanan pass his final trial to become a Jedi Knight. In the Star Wars comic series, it was revealed that the Inquisitor's spirit was somehow tied by Darth Vader to an abandoned Jedi outpost on Tempes, where it briefly fought Luke Skywalker and where it was cursed to stay forever, unable to pass on and become one with the Force.Marrok - Marrok was a former humanoid Jedi who lost his faith to the Jedi and became an Inquisitor known as the First Brother after the rise of the Empire. Marrok was introduced in Ahsoka, portrayed by Paul Darnell, where he became a mercenary working for the Nightsister Morgan Elsbeth, after the fall of the Empire. During his time with Morgan Elsbeth's forces, Marrok worked with former Jedi General Baylan Skoll, and his apprentice Shin Hati, and aided Elsbeth in her quest to find Grand Admiral Thrawn. He engaged Ahsoka Tano in a lightsaber duel during a mission on Corellia. Later, Marrok confronted Ahsoka once more on Seatos, where the former Jedi hunter was killed by Tano's blade.[56]The Second Sister Trilla Suduri was the Padawan of Jedi Knight Cere Junda and one of the few survivors of the Great Jedi Purge. After Cere was captured and interrogated by the Empire, she betrayed Trilla's location, leading to her being captured and tortured by the Empire as well, until giving into the dark side and becoming the Second Sister Inquisitor. She initially made a cameo appearance in the comic book Darth Vader: Dark Lord of the Sith, and later served as the main antagonist of the video game Star Wars Jedi: Fallen Order, where she was tasked with hunting Jedi Padawan Cal Kestis, as well as a holocron containing a list of Force-sensitive children. Although she succeeded in securing the holocron, she was eventually defeated by Kestis and Cere at the Inquisitor headquarters on the planet Nur. Cere then attempted to make amends with her former Padawan, but Darth Vader appeared and executed Trilla for failing her mission.The Third Sister Reva Sevander was a youngling of the Jedi Temple on Coruscant and one of the few survivors of the Great Jedi Purge. Reva was introduced as the main antagonist of the first season of Obi-Wan Kenobi, portrayed by Moses Ingram, where, recruited to the Inquisitorius after living on the streets, she secretly plots revenge against Darth Vader for killing her peers during Order 66, having survived being stabbed through the stomach by him during the Purge, seeking to track down and kill Vader's former master (as Anakin Skywalker) Obi-Wan Kenobi for allowing his apprentice to fall to the dark side, arranging the kidnapping of Leia Organa to lure Kenobi out of hiding. After the Grand Inquisitor attempts to take credit for her tracking down of Kenobi, Reva stabs him through the stomach, apparently killing him, and convinces Vader to appoint her as the new Grand Inquisitor in his stead. After Kenobi rescues Leia from Reva's forces before the inquisitor can personally torture her for information, Reva tracks down Kenobi again, who surmises her past as a youngling and offers her an opportunity to take her revenge on Vader while he himself. Attempting Reva attempts to engage Vader in combat, he effortlessly disarms her without using a lightsaber, before stabbing her through the gut with a lightsaber again. The Grand Inquisitor, revealing himself to be alive, takes back his ranking, before leaving Reva in the gutter to die. However, after Vader and the Grand Inquisitor leave, Reva finds a message left for Kenobi by Bail Organa, revealing to her that Vader's son, Luke Skywalker, is hidden on Tatooine, under the protection of Owen Lars, whom she had previously met there while hunting Jedi. Proceeding to Tatooine, Reva attempts to kill an unconscious Luke, but, reminded of her younger self, elects to spare him. On Kenobi's return, he forgives Reva for her actions, informing her that she can do whatever she wants with her life.The Fourth Sister The Fourth Sister is an Inquisitor appearing for the first time in Obi-Wan Kenobi, portrayed by Rya Kihlstedt. She participated at the chase of Obi-Wan Kenobi.The Fifth Brother The Fifth Brother was a former green-skinned humanoid member of the Jedi Order who eventually lost his faith in the Order and became an Inquisitor sometime after the rise of the Empire. He was introduced in the second season of Star Wars Rebels, where he and the Seventh Sister were tasked with hunting the Ghost crew after the Grand Inquisitor's death, during which they also competed against each other to become the next Grand Inquisitor. The Fifth Brother was eventually defeated after dueling Kanan Jarrus, Ezra Bridger, Ahsoka Tano and Maul on Malachor, being disarmed by Ahsoka and subsequently killed by Maul.The Sixth Brother Bil Valen was a former humanoid Jedi Knight who eventually lost his faith in the Jedi Order and became the Sixth Brother Inquisitor sometime after the rise of the Empire. He was described as tall with unnatural-looking grey skin, piercing ice-blue eyes, broad shoulders, and distinctive scar/tattoo-like marking, and was also shown to have lost an arm to Darth Vader during one of his training sessions. The Sixth Brother was first introduced in the Ahsoka novel, where he was tasked with hunting Ahsoka Tano, but was ultimately defeated by her after she caused his lightsaber to overload and explode, killing him. He later appeared in the comic book Darth Vader: Dark Lord of the Sith, set before the novel.The Seventh Sister The Seventh Sister was a former Mirialan member of the Jedi Order who eventually lost her faith in the Order and became an Inquisitor sometime after the rise of the Empire. She was introduced in the second season of Star Wars Rebels, where she was shown to be using small droids to help her track down her targets, and was also working closely with the Fifth Brother, as they were both tasked with hunting the Ghost crew after the Grand Inquisitor's death, during which they also competed against each other to become the next Grand Inquisitor. The Seventh Sister was eventually defeated by Maul on Malachor and subsequently killed by him, after Ezra Bridger refused to do so.The Eighth Brother The Eighth Brother was a former Terrelian Jango Jumper member of the Jedi Order who eventually lost his faith in the Order and became an Inquisitor sometime after the rise of the Empire. He was introduced in the second-season finale of Star Wars Rebels, where he was tasked with hunting the former Sith Darth Maul, eventually tracking him down to Malachor. He dueled Maul, Kanan Jarrus, Ezra Bridger, and Ahsoka Tano alongside his fellow Inquisitors, the Fifth Brother and the Seventh Sister, but the latter two were ultimately killed by Maul. Cornered, the Eighth Brother then attempted to escape, but his lightsaber had been damaged during the battle and exploded in his hands when he tried to use it to fly away, causing him to fall to his death.The Ninth Sister Masana Tide was a former Dowutin Jedi Knight who eventually succumbed to the dark side and became the Ninth Sister Inquisitor after intense torture at the hands of the Empire. She first appeared in the comic book Darth Vader: Dark Lord of the Sith, where she assisted Darth Vader, the Sixth Brother and the Tenth Brother in hunting the Jedi Ferren Barr on the planet Mon Cala. After Barr used the Force to turn the Imperial stormtroopers present against them, the Ninth Sister was betrayed by the Sixth Brother, who severed her right foot and left her behind to die so that he could escape, although she managed to survive. She later appeared as an antagonist in the video game Star Wars Jedi: Fallen Order, where she joined the Second Sister in the hunt for Cal Kestis. The Ninth Sister was ultimately defeated by the Jedi Padawan on Kashyyyk, who severed her right hand. However, she survived to the death once again. She was later killed by Cal Kestis on Coruscant during the events of Star Wars Jedi: Survivor.The Tenth Brother Prosset Dibs was a former Miraluka Jedi Master during the Clone Wars who eventually became disillusioned by the Jedi's role as protectors of the galaxy. He first appeared in the comic book Jedi of the Republic - Mace Windu, where he tried to kill Mace Windu during a mission on the planet Hissrich. He was defeated and subsequently expelled from the Jedi Order for his actions. Dibs later became the Tenth Brother Inquisitor in the service of the Empire and appeared in the comic book Darth Vader: Dark Lord of the Sith, where he assisted Darth Vader, the Sixth Brother and the Ninth Sister in hunting the Jedi Ferren Barr on the planet Mon Cala. After Barr used the Force to turn the Imperial stormtroopers present against them, the Tenth Brother was killed in the ensuing fight.The Eleventh Brother The Eleventh Brother was an Inquisitor who searched for Ahsoka Tano. He is defeated by Ahsoka with his own lightsaber, after she disarms him. Clancy Brown voices the Eleventh Brother in "Resolve", the first season finale of Tales of the Jedi (2022).[57]The Thirteenth Sister Iskat Akaris was a red-skinned Inquisitor appeared in the comic book Darth Vader: Dark Lord of the Sith, where she assisted Darth Vader, the Fifth Brother and another black-skinned Twi'lek Inquisitor in hunting Jedi Master Eeth Koth. While Vader dueled and killed Koth, Iskat found his wife and baby daughter, but refused to kill them, instead taking the latter and bringing her to Vader, who then left her in the care of some nursemaids. Later, the Fifth Brother informed Vader of her actions and, believing it to be an act of treason, he tried to kill her in front of the other Inquisitors. She managed to escape with the help of her fellow Twi'lek Inquisitor, but they were both eventually caught following a chase through Coruscant. Vader froze them with the Force and killed them. Iskat is the protagonist of the novel Inquisitor: Rise of the Red Blade, which reveals her backstory as a Jedi who is recruited into the Inquisitorius.Tualon Yaluna Tualon Yaluna is a black-skinned Twi'lek Inquisitor who appeared in the comic book Darth Vader: Dark Lord of the Sith, where he assisted Darth Vader, the Fifth Brother and Iskat in hunting Jedi Master Eeth Koth. Later, when Vader tried to kill Iskat for treason, he helped her escape, but they were both eventually caught following a chase through Coruscant. Vader froze them with the Force and killed them. Tualon appears as one of the central characters in the novel Inquisitor: Rise of the Red Blade.Main article: Supreme Leader SnokeSnoke was a Force-sensitive artificial being created by Darth

Sidious and his Sith Eternal cult on Exegol, and a major antagonist in the Star Wars sequel trilogy. After Sidious' death and the fall of the Empire, Snoke became the Supreme Leader of the First Order and seduced Ben Solo to the dark side, training him to become his apprentice, Kylo Ren. He was also behind the destruction of Luke Skywalker's Jedi Temple and the deaths of most of his students, in an attempt to wipe out the Jedi Order once and for all. He was ultimately killed by Kylo, after failing to foresee his betrayal. Following Snoke's death, Kylo took over as Supreme Leader of the First Order until he redeemed himself like his grandfather before him.Main article: Kylo RenKylo Ren (Ben Solo) was a former Jedi and powerful dark side wielder, and the secondary antagonist of the Star Wars sequel trilogy. He was born as the son of Leia Organa and Han Solo, and trained under his uncle, Luke Skywalker, to become a Jedi, but was seduced to the dark side by Snoke. Adopting the alias Kylo Ren, he helped eliminate his uncle's new generation of Jedi and became the leader of the Knights of Ren and a high-ranking member of the First Order. He trained under Snoke to become a powerful dark side wielder, and later proved his loyalty by killing his father when he tried to help him get redeemed. However, Kylo eventually betrayed and killed his master after siding with the Jedi Padawan Rey, with whom he shared a unique connection called a "dyad in the Force". However, instead of turning back to the light side, he took over as the new Supreme Leader of the First Order, and invited Rey to join him, but she refused.Later, Kylo had a confrontation with Luke, only to discover that he was a Force projection, meant to distract him and allow the Resistance to escape; nonetheless, Luke died as a result of the effort to create the projection, leaving Rey the only living Jedi. Eventually, Kylo discovered that Darth Sidious was alive and plotted to kill this potential rival, but instead sided with him after the latter revealed the Final Order, a massive fleet of Xyston-class Star Destroyers built by the Sith Eternal, which he promised to give Kylo control of in exchange for killing Rey, revealed to be his granddaughter. However, Kylo planned to have Rey join him so that they could kill Sidious and take over the galaxy for themselves, but she refused and attacked him. During the duel, Kylo was distracted by his mother reaching out to him through the Force (at the cost of her own life), allowing Rey to defeat him. After a conversation with a memory of his late father, Ben Solo was redeemed and came to Rey's aid in defeating Sidious. After Rey died killing the Sith Lord, Ben revived her using the Force, at the cost of his own life.The Knights of Ren were an organization of masked Force-wielding warriors, who serve as antagonists in the Star Wars sequel trilogy. The Knights were neither Sith nor Jedi, but a new generation of dark side warriors that emerged to fill the void left by the supposed demise of the last Sith Lords, Darth Sidious and Darth Vader. The Knights of Ren did not adhere to any code, willing to do anything to triumph. Their name came from a lightsaber called the "Ren", which could only be wielded by their leader. The Knights consisted of ten individuals named Marinda, Massif, Fyodor, Bazzra, Ap'lek, Cardo, Kuruk, Trudgen, Ushar, and Vicrul, and were originally led by a man named Ren, who knew Supreme Leader Snoke. After Ben Solo's fall to the dark side, they allowed him to join and demanded that he get one "good death" to prove himself. Ben eventually killed Ren himself and became the new leader of the Knights, Kylo Ren, in addition to knighting fellow former Jedi Padawan Voe. In The Rise of Skywalker, six remaining Knights (Ap'lek, Cardo, Kuruk, Trudgen, Ushar, and Vicrul) join Darth Sidious' Sith Eternal following Kylo's redemption, and are killed by the latter on Exegol.Starkiller (born Galen Marek) was the informal apprentice of Darth Vader, and the protagonist of the Star Wars: The Force Unleashed video games and literature. Born to a fugitive Jedi Knight after the Clone Wars, he was unnaturally strong in the use of the Force. Vader realized his potential when he came to kill his father, and subsequently raised him as his secret apprentice, giving him the code-name "Starkiller". When he reached adulthood, Starkiller was sent to eliminate several fugitive Jedi, only to then be betrayed by Vader. Eventually, Starkiller turned to the light side and assisted in the formation of the Rebel Alliance, before defeating his former master and sacrificing himself for the Rebellion in a fight against Darth Sidious. Vader later cloned Starkiller in hopes of creating the perfect apprentice, but the clone followed the same path as the original Starkiller: turning to the light side and joining the Rebellion.Tol Skorr was a human former Jedi Knight that was trained under Darth Tyranus (Count Dooku). He served as Dooku's bodyguard during the Clone Wars, and was very much disliked by Quinlan Vos. When Vos was revealed to have been spying on Dooku, Skorr and Asajj Ventress were sent to kill Vos. Skorr was ultimately killed by Vos, who Force-pushed him into lava.Main article: HK-47HK-47 was a Hunter-Killer-series assassin droid introduced in the video game Star Wars: Knights of the Old Republic. He was constructed by Darth Revan in the aftermath of the Mandalorian Wars and was sent throughout the galaxy on missions by the Sith Lord and assassinated those deemed by Revan as threats to galactic stability.Main article: Bastila ShanBastila Shan was a Jedi Master introduced in the video game Star Wars: Knights of the Old Republic. Shan used the force to stabilise Darth Revan, who was near death after his ship had been fired upon in an act of betrayal by his apprentice Darth Malak. This act created a bond between Shan and Revan, and Shan eventually fell in love with Revan while they were tasked with finding the Star Forge shipyard (Revan was retrained as a Jedi after his memories were erased by the Jedi Council). While hunting for the shipyard, Shan and Revan, who were accompanied by Carth Onasi, were captured by Malak. After escaping their cells aboard Malak's flagship, Shan was imprisoned by Malak after a duel to allow Revan and Onasi to escape from the Sith. After a week of torture by Malak, Shan fell to the dark side, and took her place as Malak's apprentice. In time, Shan would duel Revan, Jolee Bindo and Juhani (Star Wars), and, while she was no match for the Jedi, attempted to convince Revan to join her to become the Dark Lord of the Sith. Revan rejected the offer and made the choice of a true Jedi. Later on, after being defeated by Darth Revan in a duel on the Star Forge, Bastila was convinced to return to the path of the light, renouncing the dark side and confessing her love for Revan. Revan went on to defeat Darth Malak, upon the Star Forge, before he and Bastila were married on Coruscant.The 2019 film Star Wars: The Rise of Skywalker depicts thousands of Sith cultists and loyalists known as the Sith Eternal.[58] They are the overarching antagonistic faction of the Star Wars sequel trilogy. They are located on the Sith planet Exegol, which is described in the film as the "hidden world of the Sith".[1] The film depicts the Sith loyalists as having built the Final Order, a massive fleet of Xyston-class Star Destroyers, at the behest of Darth Sidious. They are also revealed to have artificially created and cloned Snoke,[59] whom a resurrected Sidious uses as a puppet to control the First Order and seduce Kylo Ren to the dark side.[32] At the end of the film, the Sith Eternal cultists are present during Sidious' rejuvenation through the Force and his demise at the hands of Rey, the last Jedi and Sidious' own granddaughter.[58][60] The Sith Eternal cultists are disintegrated in the explosion following Sidious' death.[58][61]The novelization of The Rise of Skywalker goes into more detail about how Sidious transferred his consciousness into the cloned body the Sith Eternal prepared for him.[62]See also: Cultural impact of Star WarsSith Lords Darth Vader and Emperor Palpatine / Darth Sidious have become iconic villains in popular culture. Their personae are frequently used as exemplars of authoritarianism, brutality and evil in serious,[63] humorous[64] and satirical[65] settings. Palpatine is archetypal as the "Evil Emperor"a cunning tyrant who rules through deception, propaganda, fear and oppression.[66] Although usually considered as a villainous "enforcer" of such power, Darth Vader has also been regarded as a tragic figure, a study in the corruption of a hero who loses sight of the greater good and falls from grace out of fear and desperation.[67]A "turn to the Dark Side" has become a popular idiom to describe an (often misguided) individual or institution's embrace of evil out of a desire for power.[68]SatanismJedi^ a b "The Casual Star Wars Fan's Guide to The Rise of Skywalker". The origin of red lightsabers can differ between the canon and Legends timelines, from synthetic crystals to bleeding kyber crystals intentionally. Characters like Inquisitors, bounty hunters, and fallen Jedi have also used red lightsabers in interesting ways throughout the Star Wars universe. Red lightsabers in Star Wars are iconic, as they are often wielded by the evil yet powerful Sith but many characters who aren't Sith (or aren't even evil) also wield red-colored lightsabers. These range from Jedi who had red lightsabers before the declaration that they were always evil and those who are evil in nature, but simply aren't Sith. Across Star Wars' long history, there have been many who have wielded such a blade, no matter what category they have fallen into. It's important to remember there are two Star Wars timelines; one that began in 2014 and has coincided with the newer movies and TV shows, and the original one that ended in 2014, now branded Legends. Red lightsabers can differ greatly depending on which timeline they originate in, and that can also explain exactly why these characters have them. In Legends, red lightsabers often come from synthetic kyber crystals, whereas in canon, they come from a dark side user intentionally bleeding a kyber crystal. Here's each non-Sith person or group who has used these lightsabers thus far in Star Wars. Related The lightsaber is the signature weapon of the Jedi and the Sith but there have actually been many different types in Star Wars canon. 26 The Inquisitors Darth Vader's Jedi Hunters Iconic to the new Star Wars canon, the Inquisitorius was a group of fallen Jedi who had been turned to the dark side. These Inquisitors hunted down Jedi survivors of Order 66, and wielded fascinating, spinning double-bladed lightsabers. These lightsabers signified them as adepts of the dark side, but as far as viewers know, they didn't contain kyber crystals bled by the Inquisitors themselves. These spinning lightsabers fascinatingly also allowed the Inquisitors to fly, somewhat. Viewers might recognize Aurra Sing from Star Wars: The Clone Wars or even her brief cameo in Star Wars: Episode II - The Phantom Menace, but the character has a much longer history in Star Wars comics. In the Legends timeline, she was a Jedi apprentice who left the order to become a bounty hunter. As a bounty hunter, Aurra Sing assassinated many Jedi and politicians, oftentimes using a red lightsaber she stole from a fallen Jedi as during the period before Star Wars: Episode II - Attack of the Clones, it was believed in comics that Jedi could have red lightsabers. Only appearing in one story, Sheyvan was a Dark Jedi who took the role of "Emperor's Hand." Emperor's Hand was a role given to dark side individuals who served the Emperor as assassins. Sheyvan was a talented duelist and military leader who trained a group of cloned Jedi and planned to kill the Emperor, though he was stopped by Darth Vader who regretted killing Sheyvan because of how talented of a fighter he actually was. Appearing in Jedi: Survivor, Dagan Gera is a Jedi hailing from the High Republic Era. Gera was sealed away for over 200 years on the planet Koboh, where he was awoken by Cal Kestis. Upon realizing the Jedi and Republic had fallen, Gera felt immense rage and bled his kyber crystal inside his lightsaber. This gave him a red saber to use as he fought Cal Kestis on a rampage towards his treasured planet Tanalorr during the Imperial Era. Upon realizing the Jedi and Republic had fallen, Gera felt immense rage and bled his kyber crystal inside his lightsaber. Tholothian Jedi Council member from The Phantom Menace and The Clone Wars, Adi Gallia, is mostly depicted with a blue lightsaber. In Legends comics released before Attack of the Clones, however, Gallia actually wields a red-bladed lightsaber. This is unaddressed and not any sign of the dark side, being simply the result of the lore about red sabers not being fully established at this point. In Legends, her shift to blue was explained as being because she didn't want to be associated with the recently revealed Sith, Darth Maul, in The Phantom Menace. Related At the time of Order 66 and the Great Jedi Purge, there were several major members of the High Jedi Council. This is what you need to know about them. Also appearing in The Phantom Menace and The Clone Wars, Even Piell's situation is remarkably similar to Adi Gallia's. The Lannik Jedi Master wielded a red lightsaber simply because the lore surrounding them wasn't properly established. This was also changed in later appearances, where he mostly wielded a green lightsaber. The game Star Wars: Hunters is a free-to-play arena battle video game that has not yet been released worldwide despite being released in a few countries in late 2021. The game's canonicity involves an arena on the planet Vespaara, where fighters battle for an audience. One of the fighters is a Force-sensitive young woman named Rieve, who wields a red lightsaber to play the role of a Sith for audiences' entertainment, while she was actually using the arena as an outlet for her Force powers. In Star Wars Legends, Qui-Gon Jinn actually had three Padawans, not just Obi-Wan. One of these Padawans was Xanatos, a young man from the planet Telos IV. He fell to the dark side due to his immense personal connections to his manipulative father on a mission to his homeworld, where his father was governor. Xanatos then reappeared years later with a synthetic crystal making his lightsaber red, as he challenged Qui-Gon and his new apprentice. Introduced in the MMORPG Star Wars Galaxies, Aralina Silk is another one of the Emperor's Hands. Present at the large battle on the planet Restuss in the Legends timeline, Silk is killed, leaving her red lightsaber behind. Not much else is known about Aralina Silk other than she possessed a rare lightsaber hilt and served the Empire until shortly after the events of A New Hope. Falling to the dark side after Order 66, Sa Cuis was a Dark Jedi who commanded a unit of Imperial Commandos during the early days of the Empire. He was another one of the Emperor's Hands and wielded two lightsabers one red and one white. After challenging Darth Vader's authority in a duel, Cuis was killed by the Sith Lord but not before his DNA samples were taken for cloning purposes. After challenging Darth Vader's authority in a duel, Cuis was killed by the Sith Lord. The lightsaber might be one of the most historic weapons in cinema, and it has continually evolved since A New Hope flew into theaters in 1977. Though everyone knows about the basic types of lightsabers that Anakin and Luke Skywalker wielded, many styles have been constructed and showcased through the years of movies, shows, books, and more.Credit: LucasfilmRelated:Disney Releases Ahsoka Exclusives Only for Disney+ SubscribersInterestingly, a new lightsaber might have made its debut in the trailer for Star Wars: Visions Season 2. Though it has not yet been fully explored, we could have seen the first instance of the new rapier lightsaber. Though this style has been teased plenty in the franchise before, it could be the first time a Jedi and Sith use them in a more refined combat style.Lets look more deeply into the types of lightsabers that have been shown in Star Wars canon and those warriors who have wielded them.Types of Lightsabers and Who Has Wielded ThemDual-Phase LightsaberCredit: LucasfilmArguably the most powerful lightsaber belongs to the most powerful being. Darth Vader is in sole possession of the dual-phase lightsaber, which is unique for several reasons. For one, this lightsaber focuses on having two crystals within its construction. While most hilts are generally constructed with one kyber crystal, Vader uses two, which also have a pretty scary function.Darth Vader can switch between both these crystals to create a new alignment that allows his weapon to grow in length. The dual crystals represent a more violent time, which could be why Vader is fond of using them. He was created before the start of the Galactic Empire, and with being burned alive by his mentor, he might want to hold onto as much violent hatred as possible.The dual-phase lightsaber is also said to be one of the most challenging models to manage, which is why only those with the master skill in technique and combat should wield them. Vader became one of the most powerful people in the universe, and as such, he also wields the most powerful weapon. The deep red color is also quite frightening.Standard LightsaberCredit: LucasfilmAs mentioned, the standard lightsaber is one that fans have seen plenty in the Star Wars universe. Though Luke and Anakin Skywalker were powerful Jedi, they didnt need to rely on something as powerful as the dual-phase lightsaber. The standard lightsaber is of simple construction and uses only one crystal to emit its blade and power.The kyber crystal within the standard lightsaber is meant to do all the heavy lifting, meaning anyone can theoretically wield these. For instance, when Finn picks up Lukes former weapon, he can use it. He cannot use the weapon to the best of its abilities, as he does not possess the ability to wield the force, but he can still swing it around to do some heavy damage if need be.Luke Skywalker, Anakin Skywalker, and Qui-Gonn Jinn favored the standard lightsaber, likely because they were far more proficient in wielding the force to act as a conduit to make their weapon even stronger.Double-Bladed LightsaberCredit: LucasfilmAh, where would we be without the theatrics and choreography of Ray Parks from The Phantom Menace? In the late 1990s, the prequel trilogy started by introducing one of the most storied and controversial characters: Darth Maul. Maul became a household name in the Star Wars history books simply because he brought forth the double-bladed lightsaber. Though it has become more commonplace for Jedi Knights and Sith Lords to use, it was first highlighted by Maul.The lore states that Maul poured over Sith records to help create his version, which contains multiple kyber crystals. The double-bladed lightsaber takes great skill and athleticism simply because of its extra-long hilt and blade length. One wrong move, and someone could be walking away with a missing appendage.Save Opress, Mauls brother, also used a double-bladed lightsaber. Pong Krell from The Clone Wars also used two double-bladed lightsabers, though he did have four arms, so it was likely easier for him to do. More recently, Orla Jareni and Keeve Trennis from the New Republic were told to use the double-bladed lightsaber. Krell and Jareni used a hinged lightsaber, also known as the switchblade.Cal Kestis from Star Wars Jedi Fallen Order and the upcoming Star Wars Jedi Survivor can switch between single-blade and double-bladed lightsaber stances.Switchblade LightsaberAs mentioned, Pong Krell used a hinged or switchblade lightsaber that could morph from a single-blade into a double-bladed one. Though fans might not remember Krells design, it was brought back into everyones mind when Reys visions showcased her using one. The blade can fold to create the makings of a singular blade, though its two.Rey fought Dark Side Rey in her Force vision, which also showed how the switchblade lightsaber could trap another lightsaber within it. This would be effective in disarming a foe. It is a bit stranger that no current characters in the Star Wars mythos are using them.Lightsaber PikeCredit: LucasfilmThough the lightsabers mentioned above are clearly of the sword variety, there are also exciting ways that kyber crystals can be used to create other bladed weapons. One of those weapons happens to be the lightsaber pike. This weapon was made famous by the Jedi temple Guard in Coruscant in both Rebels and The Clone Wars. The yellow blades are meant to indicate the long-lasting Jedi Order.Interestingly, Luke Skywalker wielded a broken lightsaber pike, which he found by a Jedi temple guard that had been slain. Though the pike generally has two blades, Luke found one with only a working blade, which he used to defend himself against the Grand Inquisitor. Luke repaired the pike to act as a standard lightsaber before he created his own.Crossguard LightsaberCredit: LucasfilmWe did mention that new lightsabers had begun to be created as the franchise went on, and one of the more exciting creations is the crossguard lightsaber that Kylo Ren wields in the sequel trilogy. At first glance, everyone became obsessed with this blade simply because it utilized more of a medieval way of fighting. With the cross guard, no one could pass your weapons guard to injure or end you.What made Rens more interesting is the kyber crystal he used made the blade seem far more active and unpredictable. This blade could have easily been more of the protosaber variety, though the blade just crackled a ton, likely from its design. Stellan Gios of the New Republic also uses a variation of the crossguard lightsaber, though his blade is far more advanced.Gios design uses a hilt to extend the two crossguard saber blades, whereas Rens was just two smaller blades that jutted out of the side of his weapon.ProtosaberCredit: LucasfilmRelated: Upcoming Star Wars Series Could Introduce All-New LightsaberThe protosaber is said to be the least refined of all the lightsabers, as the earlier models took far more to operate. The blades of these lightsaber models were so wild they had to be plugged into a power pack, as the original designs did not possess the kind of power that could be designed into a hilt.The protosaber also made its way into the Vader Immortal VR game, which showcased an elegant hilt that was made of prongs that led to the kyber crystal, which was exposed. We would imagine the idea of the blade being wild had to do with the kyber crystal not being contained within the hilt. The ancient protosabers were naturally forgotten in favor of the standard model that followed.Apart from being able to wield this weapon in the Vader Immortal game, Odan-Urr was said to use a protosaber, which he plugged into his belt via a power pack. We imagine it would be challenging to defend the power pack from would-be attackers.Shoto LightsaberCredit: LucasfilmThe shoto lightsaber is wielded by the strongest of weapon users. Their shorter blades allow for far more aggression when attacking, which is why Ahsoka Tano now wields two. She initially wielded one in her off-hand when she was learning from Anakin Skywalker. She has recently been shown wielding two, meaning she learned to be efficient with both since The Clone Wars Days into her own solo series.Another famous Jedi who used the shoto lightsaber is Yoda. Naturally, he would be one to use such a short blade since he is smaller. However, we all know how lightning-fast and aggressive he can be, especially when he fought Emperor Palpatine in Revenge of the Sith.There is also a Guard Shoto blade with a 90-degree hilt, allowing the user to switch faster and more fluidly from offense to defense. Ahsoka could be wielding this type, though we will likely find that out when her solo series is released.Inquisitor LightsaberCredit: Electronic Arts (EA)/Respawn EntertainmentThe lightsabers that the Inquisitors wield might be some of the most interesting designed ones. They feature a circular hilt that allows the blade to rotate 360 degrees around. This can lead to the blade being used in a variety of ways. For instance, in the Obi-Wan Kenobi series, the Grand Inquisitor rapidly spins his blade in a helicopter motion, which we imagine would destroy anything in its path.Someone proficient in this type of blade would certainly be one that should be considered a master of combat. The blade rotating like that would need cunning and skill to deliver blows to their opponents continually.The Inquisitors all used these blades when they were introduced as Darth Vaders agents in Star Wars Rebels. They also appeared in the Star Wars Jedi Fallen Order video game, as the Ninth Sister used a double-bladed lightsaber with this rotating hilt.The DarksaberCredit: LucasfilmThe Darksaber is a one-of-a-kind weapon that has ties to the Mandalorian people. This blade has been mentioned numerous times and has shown up in Star Wars lore for years. However, it has now found its way into the canon by being the storys subject for The Mandalorian. Moff Gideon came upon the blade from Bo-Katan Kryze, who then lost it to Din Djarin.The blade was created over 1000 years ago by Tarre Vizsla, a Mandalorian and the first of his kind to ever sit on the Jedi Council. The construction of the blade resulted in the blade having a more cylindrical design and one that looks more like a longsword than any other weapon.What makes the Darksaber that much more interesting is that it operates in a sort of reverse way than the standard lightsaber. Though anyone can wield the standard lightsaber, it is further expanded by those who use the force. The Darksaber operates in a way that those with a sheer will can make the weapon powerful. This is why Moff Gideon can proficiently swing the blade. Din Djarin also had trouble using it because his mental and emotional state did not match the weapon. The Darksaber also allows the wielder to call themselves the leader of Mandalore.Ezra Bridgers Lightsaber GunCredit: LucasfilmOne of the most unique and bizarre lightsabers belonged to Ezra Bridger. He built his lightsaber hilt out of a blaster, which allowed him to use the lightsaber and gun consecutively. The lightsaber was also one-of-a-kind, though it was destroyed by Darth Vader, leading to Bridger wielding a standard lightsaber.Bridger is set to appear in the Ahsoka series, and though he has gone off with Thrawn, we could see a version of this lightsaber come back. That might be unlikely, as his design was directly related to his own insecurity in his blade handling skill. Still, it would be interesting if he found a way to be proficient with a blaster and lightsaber again.Training LightsaberThis lightsaber is simplistic, short, and mainly designed for the young padawan who use it when they start their Jedi training. Younglings are shown using these blades in the prequel trilogy and sadly were not equipped with them when Anakin Skywalker happened upon them.The training blades are also far less powerful than regular lightsabers, so they are not built with the ability to damage anyone seriously. They are said to stun the muscles, though. So even if the younglings had these blades, they wouldnt have done much against Anakin.LightwhipCredit: WookiepediaThe lightsaber whip, or lightwhip, is a lightsaber variant that has been fashioned to have multiple plasma blades that can do heavy damage. The Nightsisters of Dathomir are said to be some of the only wielders of this lightsaber style, though it has popped up in other mentions throughout the Star Wars universe.For instance, High Republic Jedi Venestra Rwoh modified her lightsaber to include a whip mode, which she saw in a Force vision. We are unsure if this model will make its way into more mainstream Star Wars Universe releases. Still, we could also see some Praetorian Guards using some variation of this weapon, considering they already use a lightsaber variation in their weaponry.Credit: LucasfilmRelated: Kenobi Will Save Rey in New Star Wars ProjectThere you have it, the different lightsaber models that have been introduced in Star Wars, and the legends who have wielded them. Though there is not a category for the rapier lightsaber yet, it is likely to be made known once Star Wars: Visions Season 2 comes out and everyone can see its design more clearly. It does look exciting, and we cant wait to see the epic battle that happens with those blades.Which lightsaber model would you wield? Let Inside the Magic know in the comments down below! History: Kylo Ren constructed his lightsaber using an ancient design from the Sith planet Malachor. Characteristics: Kylo Rens crossguard lightsaber was powered by a cracked red kyber crystal, which gaveit its unstable appearance. Status: Once Kylo firmly rejectedthe Dark Side in The Rise of Skywalker, he threwhis lightsaber into the ocean on Kef Bir.History: Luke built his second lightsaber by following instructions left for him by Obi-Wan. He built his lightsaber using scavenged parts from Tatooine. Characteristics: This saber is similar in design to Obi-Wans third lightsaber. The lightsaber is powered by a synthetic crystal that Luke made himself, instead of the traditionally used and naturally occurring kyber crystal. Status: The lightsaber was last seen in Lukes possession.History: Vader built a new lightsaber after he lost his second one during his duel with Obi-Wan Kenobi on Mustafar.Characteristics: In the Expanded Universe, Vaders new lightsaber was powered by a synthetic crystal given to him by Emperor Palpatine. The new weapon emitted a red blade which better reflected his new Sith status.Status: It was last seen tumbling down a reactor shaft aboard the Death Star. It was quickly followed by a wailing Palpatine.History: Anakin constructed his second lightsaber after he lost his first one, along with his arm, at the Battle of Geonosis. Characteristics: This lightsaber has a single blue blade. Status: Rey wieldedthis lightsaber in Episodes VII-IX, but ultimately buriedit in the sand on Tatooine.History: Obi-Wan had three lightsabers over the course of his life hebuilt his last lightsaber after his second was destroyed by Darth-Maul.Characteristics: This saber has a skeletal make with a black ridged handgrip and a blue blade.Status: The lightsaber was taken by Darth Vader after he and his former master dueled for the final time.History: Mace Windu builtthis second lightsaber upon being appointeda senior member of the Jedi Council. Characteristics: Unlike most Jedi lightsabers, Windus blade was purple. Status: Windus lightsaber flew out of Palpatines office window afterAnakin cut off the Jedi Masters hand.

Star wars character with red and purple lightsaber. Can jedi use a red lightsaber. Star wars red lightsaber meaning. Jedi with red lightsaber. Star wars character with 2 red lightsabers. What color are lightsabers in star wars. Who has a red lightsaber in star wars.
